

Leaflet

School pros and corns

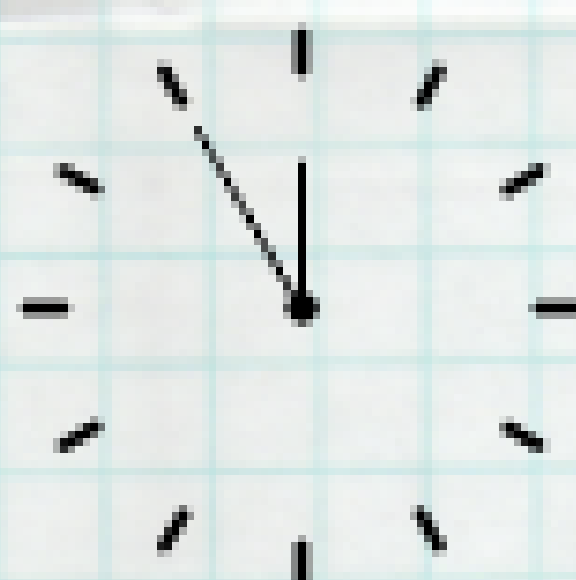

Classrooms- the posters and decorations inside rooms are interesting and useful but some of the classrooms need renovation

- Canteen - there is delicious food and nice staff but the lunch breaks should be longer

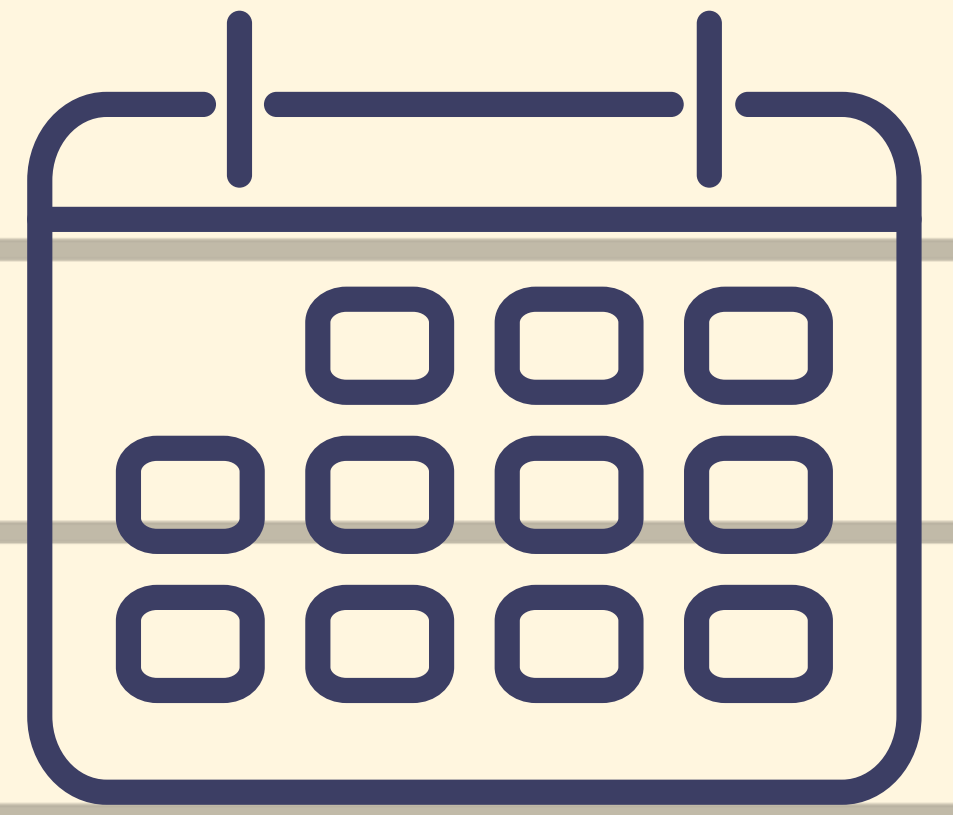

- School equipment - it's quite good enough but a great idea would be to buy tablets for all students and modern educational equipment including musical instruments and sports accessories

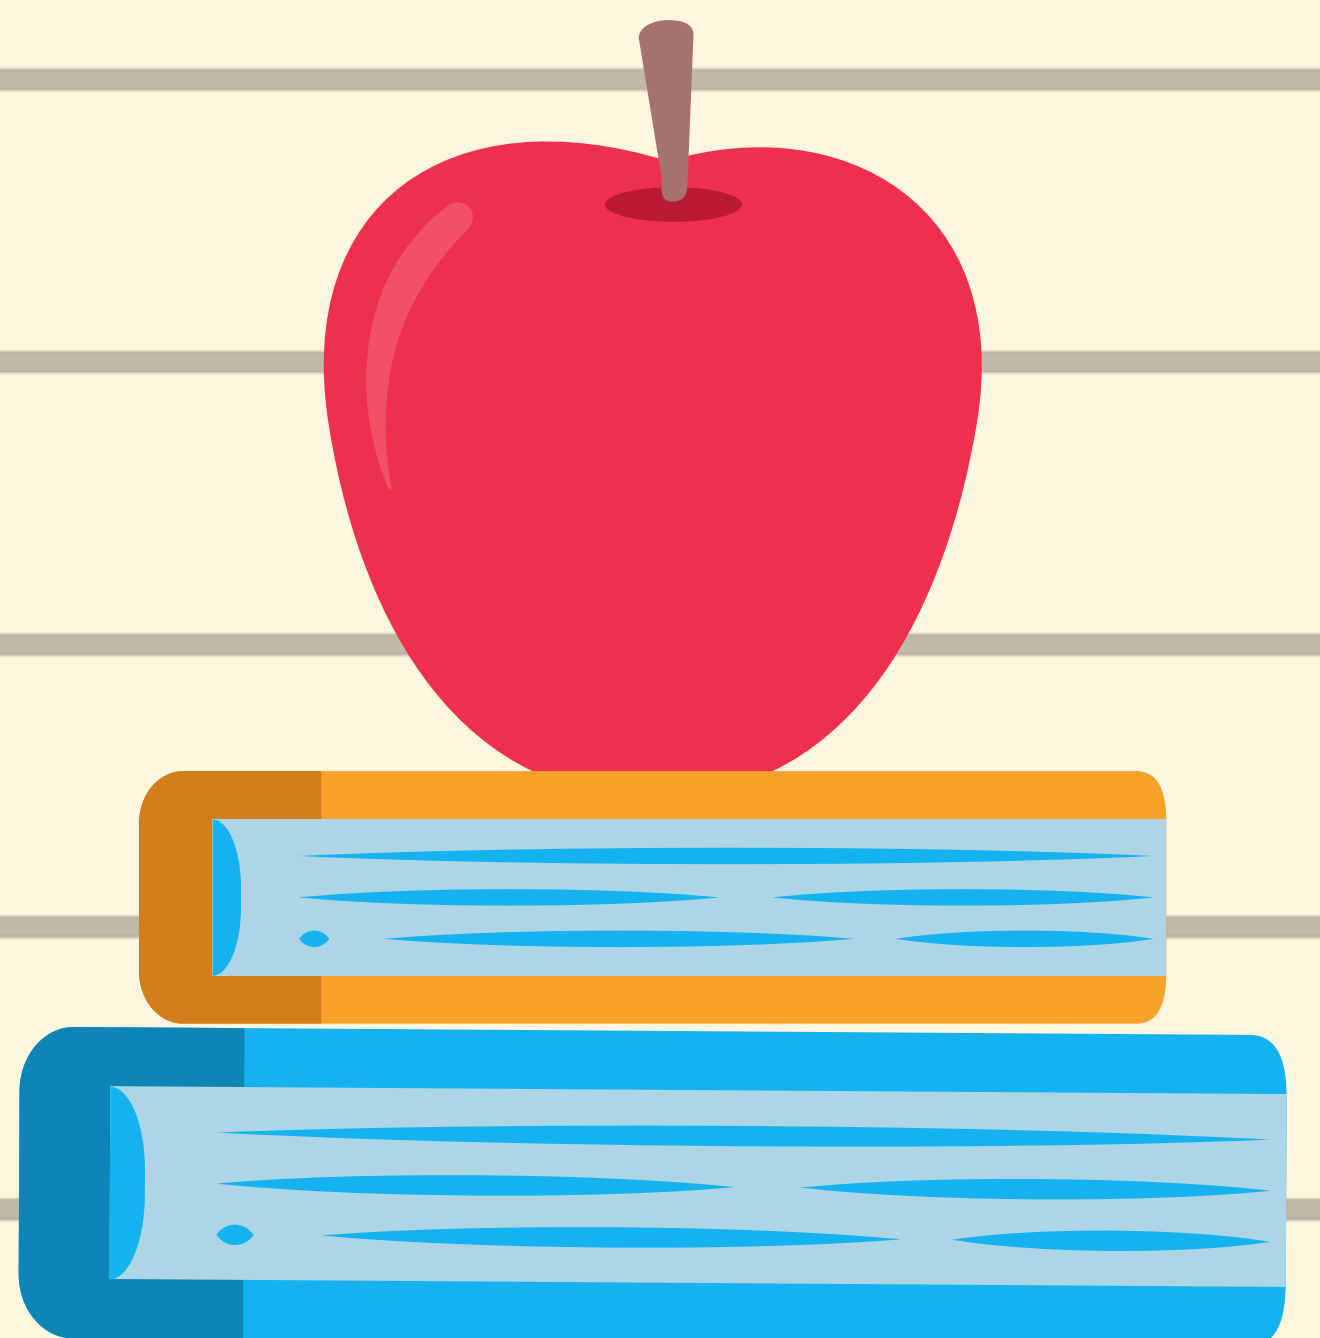

- Common room - children can spend time there in a very active way but there should be more teachers to take care of them and more space to play

- Timetable – good school hours ending but the breaks could be longer

- Teachers – they are very helpful and nice but some of them could make their lessons more creative and interesting. They should also give less homework

- After-school classes – there are some interesting extra classes but the offer is very limited so there should be more possibilities to develop student's interests in learning foreign languages, music, sport and others

Basic Program

Awesome Module (Running)

- Curriculum – students learn a lot of important things but the curriculum is overloaded and some of the material won't be useful in the future

End Program

CLASSROOM RULES

Keep our
classroom
clean

Let's be
helpful
whenever
we can

Atmosphere -
most students
support each
other, are
helpful and
friendly but

there are also
examples of
bad behaviour
which should
be combated
immediately

Let's
all do
our
best!

Commuting -
travelling by
school bus is a
good option
but the number
of school bus
courses should
be increased
just to avoid
waiting for
them for a
long time
