

Closer to the Story

To be in the middle of the world and to discover that the deep meanings of the being materialize in poetry and story, is almost a miracle. Klaudia Muntean was our boat in mysterious areas and those fragile hands bravely took the helm and fought wars, faster than what I see on the news now, in which beauty, sister with peace, won.

“We started from the idea that the stories that children create (bringing to the surface their inner world) are an excellent tool for their emotional development – that’s how TeZeus came about”, and we can only be grateful to Klaudia Muntean that the gods were with us in the game “TeZeus: Journey into the Labyrinth of Story”.

The soft light from the photos and the sign of the winners. The creative writing workshop was designed to capitalize on creativity, imagination, and group socializing, based on some cards with exceptional graphic illustrated characters was the challenge of the meeting.

The approach was scored by the participants based on the Circle of the Traveler in the story: initial situation, help, motivation, barriers, evidence, symbolic death, rebirth of the hero and life lesson.

The stories were read in front of the class by a representative and each group voted and argued the most attractive story. The workshop had the chance of a coordinator and creator of the game, in time, and the pupils of the 6th grade B were awarded with a diploma for Perfect Stories.

Another workshop is coming soon and we look forward to a new experience in the world of creative writing. We can already tell you a secret: it will be about a wonderful poet, Mihai Eminescu!
