

The Colours of the Francophonie

In March, the pupils of “Constantin Noica” Theoretical High School from Sibiu City, Romania discovered the values of Francophonie, celebrated worldwide on March 20th. In such playful workshops, they understood that the French language unites us through the diversity of the peoples who speak it and that by accepting diversity we become more tolerant.

The Colors of the Francophonie inspired the little ones in the 5th and 6th grade to wear yellow, green, purple, red or blue T-shirts. They made plates with the continents where the French language is spread, they raised balloons through team games showing the unity and understanding between the francophone peoples.

At our high school, in the optional course “Culture and Civilization of French-speaking countries”, the pupils of the 11th grade B philology coordinated by Mr. Mihai Ordean, the headmaster of our institution and their French teacher, Mrs. Minodora Beza, celebrated Francophonie by imitating famous people from the world of music, sports, literature and even of diplomacy.

The contest “La gala des célébrités” was won by the pupils Diana Mărinică and Delia Mărginean, who managed to incite the audience to dance to the lyrics of the Canadian singer Céline Dion. The jury, made up of their own colleagues, tasted the culinary flavors of specific dishes from Switzerland, Belgium, Monaco or even Africa, prepared by the pupils themselves. Bon appétit!
