

Documentation Friday

After the warm-up activities on the playground the students were divided into 5 groups and worked on different presentations about the different activities that we have done during the week.

As part of the documentation team of our last weekday in Mallorca, we split into smaller groups to follow and join the revision process that our colleagues took up, also separating into the different days to write summaries, upload pictures and prepare the presentations.

These will be displayed this evening as a part of our goodbye gathering, followed by a buffet kindly prepared by our hosts and a party to celebrate the new experiences, places seen, memories and friendships made, as well as our upcoming trip to Croatia, which we're all looking forward to.

The various groups had of course a similar work pattern and plan, so after writing a text about the day's activities, they used it to create a PowerPoint presentation, adding apt pictures and getting ready for tonight.

Group 1: Monday

The Group Monday split in five groups by countries. Each of these presents a different part of the day, talking about the warm-up activities and the headteacher welcome, the Spanish, Swiss, German and Croatian presentations as well as the visit to the winery and Ca'n Gelabert.

Group 2: Tuesday

They uploaded pictures and information on "etwinning", wrote about the Erasmus project and what we learned (fake news, social media, mossos...), divided into 3 smaller groups to do so.

This project helped young people to understand consequences of fake news and to learn how to use the internet in a responsible way.

Group 3: Wednesday

The smaller groups collected the photos taken on Wednesday, the information necessary to write a text about what happened and about the day in Mallorca.

Group 4: Thursday

This last team also prepared the material needed for this evening about the workshops we had on topics like Digital Identity.

Movie Making Group

One of the teams worked on a little film from each day they documented. They downloaded a special program and after this, they started exchanging the material and producing the video.

We all (documentation group) consequently wrote texts that we compared and merged in the informatic room to turn them into a presentation of our own.
