

Virtual Reality Class For Us

THE 3RD TRANSNATIONAL PROJECT MEETING "VRClass4US":

The Third Transnational Project Meeting "Virtual Reality Class For Us" took place in Daugavpils, Latvia, on September 6th 2018. The project team was welcomed by the Head Teacher of Daugavpils 3. vidusskola and had the pleasure of watching the outstanding performance of primary school pupils' choir. Then the participants were shown around the school. They watched some lessons, for example Robotic technology, Physics, English class and Latvian lesson for primary school pupils. A short visit in the school exhibition room was a good opportunity to learn about the school's impressive history and long tradition.

Just as on two previous occasions, the project session met all the planned objectives. In the friendly and work-inspiring atmosphere, the participants discussed and analysed all the dissemination activities conducted so far. Rosario Cuart prepared the topics of the intermediate report for those who had not issued them. The team worked extensively on planning the activities for this school year. The criteria regarding the choice of the three students from each school to visit Romania mobility proved the most important. It was decided that the English language test was to be administered to all the candidates but it was not supposed to be the main prerequisite for choosing the best team. The most desirable feature for them was defined as the ability to co-operate and work in a team. The ability to co-operate as well as to communicate effectively was clearly demonstrated during the teachers' meeting in Latvia. The quality team assessment showed that the participants highly appreciated the general atmosphere, organization and communication among the partners. All participants are convinced that the next project meeting, to be held in Romania in March 2019, will prove equally effective. See you in Romania!

October, 2018
