Content of the Green AreasVideo

The film consists of 5 videos. Each school made a 100-second film showing the green areas around the school.

The film was made using the Movavi application.

The contribution of each partner.

Each partner prepared a 100-second video. In the video were presented the green areas around the schools, the most representative for our project.

The structure of the Green Areas Video: 500 seconds

- Title
- one Italian green areas video: 110 sec
- one Polish green areas video: 100 sec
- one Romanian green areas video: 100 sec
- one Spanish green areas video: 110 sec
- one Turkish green areas video: 110 sec

App Used for this work.

Movavi Video Editor is a program with lots of editing tools for videos but also is easy to learn and use. It can be used for most types of video formats. Also Movavi makes it easy to export your edited videos in a very simple way.
