

Magic of Numbers

***Number 7 is probably
the most important
number in the world
of magic.***

***Therefore Magic of Numbers class
consisted of 7 tasks / assignments.***

E.g. in Harry Potter books number 7 appears many times (Harry was born in the 7th month of the year, the Weasleys had 7 children, there are 7 years in Hogwarts School, ...)

TASK 1 - SEVEN GOOD QUALITIES OF A GOOD WIZARD / WITCH

In this task the students had to collaborate with their housemates. They used the [FORUM](#) (called "Seven Good Qualities ...") and discussed and together agreed on 7 good qualities.

TASK 2 - SHOOT THE NUMBER and SMALL OBJECTS

Being nimble and fast is sometimes very useful too (remember e.g. the Battle of Hogwarts). That is why in this task the students practised these skills.

Besides fantastic animals there are also fantastic flowers and you can see some of them in the two pictures. The task was to choose one of them and shoot all the hidden numbers and small objects. After the game the students made a cutting of their results and uploaded it in the twinspace.

TASKs 3 to 6 - DO THE LIVEWORKSHEETS

Four liveworksheets were created especially for Magic of Numbers. When doing them, the students improved not only their maths skills, but also logical thinking, reading comprehension and listening comprehension.

The image displays four Project SMILE liveworksheet pages. The top-left page is titled "Project SMILE - The Magic of Numbers" and features a silhouette of a castle. It contains math problems involving numbers and a word problem about books in a library. The top-right page is titled "Project SMILE - H. Potter in Numbers 1" and features a scene from Harry Potter. It contains math problems about characters, addresses, and ages in the Harry Potter series. The bottom-left page is titled "Project SMILE - H. Potter in Numbers 2" and features a scene with Hermione Granger. It contains math problems about the start of the story and the number of characters. The bottom-right page is titled "Project SMILE - Text Decoding Lesson" and features a scene with a dragon. It contains a text decoding exercise with a grid for writing the decoded text.

TASK 7 - CODED EVALUATION

In one of the previous liveworksheets the students practised decoding, in this activity they practised encoding and at the same time they evaluated their work in Magic of Numbers class. They wrote a sentence or two to evaluate their work - was it challenging? ok? easy? ...

When coding, they were to use exactly three different numbers instead of the letters, e.g.

"I rea11y 1iked the 7ide0s. E7erything was 0k, n0t t00 hard, n0t t00 easy f0r me."
