

# From GAZİ MTAL

*DEAR FUTURE GENERATIONS,*

I am İrem,

I have learned so many things in life.

I should like to say two things.

One is about our realities and material world.

The other one is about moral & eMotional world.

The first one makes us intellectual.

We should struggle to reach the scientific facts & truth

The second one makes us happy and connected.

Love is the most important thing in life

Love & care for your family, friends and animals.

Tolerate each other.

Be aware of the people who need you.

Don't forget to help the poor.

Leave a green planet to the future generations.

You will see that the world becomes a better place for All of us.

*Much love,*

İREM A.
