DELIVERY FOR FUTURE GENERATIONS

Dearest FUTURE. • GENERATIONS,

My name is Osman and | am 15 years old. | live in Ankara, TURKEY, | always look forward to writing you a letter. | don't like to give advices ,but | have some messages for you.

I have learned that ;Love, Family, Friendship, justice, equality, are the most important values in our life. And also animals, nature & environment make this life meaningful. We need a planet where we can live with other people in equal conditions together with animals.

We must care for our planet and share it with animals. Nobody has any right to to behave selfish.

We all think about the next generations and want to leave you a green, safe planet.

I am sure you will also think about the next generations and care for our planet.

Best wishes!

OGMAN D
