

GAZİ V.T.A. HIGH SCHOOL

Dearest future generations,

Hello I am Tuna !

First of all I want to point out the importance of health and wellbeing. If you have a healthy lifestyle, you can have whatever you want in your life. Secondly I want to take your attention to the environmental problems. We must protect our earth by being nature friendly individuals.

Save the Nature.

Protect the animals.

Don't disturb our natural beauties. Look at the blue sky and wonderful sea. Listen to the song of the birds. We live together with all these animals in this green planet.

Respect all living things.

Recycle and don't waste our natural resources. There is no other planet. This world is our home. The one for all of us. I will leave this planet to you. And you will leave it to other generations.

Finally I can say that the secret is in your heart.

Love yourself and Love this earth, save it, keep it and leave it green to future generations.

I am sending you ALL my love...

Best,

Tuna A.
