

GAZİ MTAL

Dear future generations

I am Çağrı,

As a human being ,my message to future generations is so simple and clear.

They are my promises;

I promise to love & care for the people and animals .

I promise to help the poor.

I promise to respect for other people and be tolerant to the people around me especially to my family and friends.

I promise to save my planet.

I promise to eat organic and use natural materials.

I promise to re cycle and compost.

I promise to do more exercise and walk more.

I promise not to use plastic materials.

I promise to be creative and hardworking.

I wish you a green earth ,blue skies, clean sea.

I wish you a healthy , wealthy ,equitable & sustainable life.

Loves

Çağrı Y.
