Extinction Oceans And Fish Farming

A study from an international team of ecologists and economists have predicted that by 2048 we could see completely fishless oceans. The cause: disappearance of

Oxygen
Deficient Dead
Zones

Bottom
Trawling

Oceans
Without
Fish

If there are:

- 100,000,000 different species on Earth
- and the extinction rate is just 0.01% / year
- at least 10,000 species go extinct ever year

Reply Quote Edit Delete

kuzey badilloğlu - 02.06.2021 @ 07:38

There are 128,918 species that are endangered and threatened with extinction.(International Union for Conservation of Nature (IUCN) According to the news) and

In 2020, 36 plant and animal species were declared extinct.
