Primary school „Jane Sandanski“

Начално училище „Яне Сандански“

Our class chose to get acquainted with the life of the earthworm.

The earthworm lives in the soil /
garden, forest /.

We dug up soil with worms and put
it in big jars in our classroom.

We began to study the living conditions of the earthworm, its benefits for soil fertility and the danger of it disappearing as a result of fertilizing the soil with pesticides.
