Primary school „Jane Sandanski“

Начално училище „Яне Сандански“

With this activity the students from each class demonstrated part of their work on the project.

The implementation of this activity has become a real holiday for all students in the school.

They looked at the insectariums with curiosity, asked questions, wanted to touch our animals.

Very often the questions were answered not only by the teachers, but also by the students who learned interesting facts and took care of the animals in the insectarium.
