

Action P 22-Food chain in a forest

# The food chain and its importance for ecosystems

## 2020/2021

## Action P 22- Food chain in a forest

In this activity, students demonstrated their understanding of the food chain - who eats what.

# Action P 22- Food chain in a forest

The students came to the conclusion that every food chain starts with a plant.

- The plant is a producer
- it is food for the first consumer, which is a plant-eating animal
- the first consumer is food for the second consumer, who is a predator and feeds on a herbivore

Manufacturer  
/plant/

first consumer  
/herbivore/

second consumer  
/predator/

# Action P 22- Food chain in a forest

All students accepted the challenge to draw a food chain and tell about it.
