

Action P 17-breeding mammals-rabbits

The rabbit-class pet 2020/2021

Action P 17- breeding mammals-rabbits

Our class decided to study rabbits. Our idea was helped by a parent who raises rabbits and lives next to the school. We watched their development every day.

Action P 17- breeding mammals-rabbits

We observed all the processes of breeding, feeding, reproduction, birth, care for newborns with great interest.

The rabbit gives birth to its young. From a cardboard box we made a home nest for the little ones.

The babies were born without fur, with closed eyes and ears in the first week.

Action P 17- breeding mammals-rabbits

After the tenth day, they began to open their eyes and grow fur.

after 4 weeks

Action P 17- breeding mammals-rabbits

One of the bunnies became our favorite and we love him in our classroom.
