

P14 activity - An outing in the forest

An excursion to the Botanical Gardens

In December 2021, the 5th grade students of our school went on an excursion to the Botanical Garden of Stavroupoli.

Accompanied by a forestry expert, students were able to observe, touch, smell and hear about many different types of plants, shrubs and trees. They also learned about the uses of these plants in their daily lives and everything we produce from these plants, for example tea, aromatic herbs, decorative flowers, medicinal plants and even furniture. At the end of this excursion the students were able to understand the absolute need on earth for the existence of the plants they had seen.
