

Project name voting results

36 students from 2 schools in Cyprus and 1 school in Spain took part in the voting competition so a project name could be chosen. Nearly every project name received some votes. The votes from Dasoupolis primary school were halved as there twice as many voters as the other 2 schools. Using Microsoft Excel the votes were counted and the above table was created. The project name with the most votes ended up being MI-SELF! Well done to all the students who voted for this title but also for every other title! The project name was one of the names submitted by the Potamia primary school in Cyprus.
