

More local production:

Why? Most of things we eat are from imports, which means that our food doesn't come from the local producers, and in most of the case the fruits or the vegetables have a lot of chemicals products on it.

common production

- *permaculture
- *vertical garden (roof garden...)

ECO-FRIENDLY AGRICULTURE

special class:

- *association of plants(or insects) against insects.
- *more seasonal fruits and vegetables
- *control the production and eliminate invasive species
