

A vertical garden wall featuring a variety of lush plants. The composition includes large, heart-shaped green leaves on the left, clusters of small, bright green ferns, and patches of plants with deep purple and magenta foliage. The overall effect is a dense, textured wall of greenery.

The Green Walls

Project: put green walls in the high-school

The advantages of the green walls

Benefic for our
health

That improve the
quality of air

Decreases
temperature

Makes the
atmosphere
relaxing

How to water the wall ?
