

CiIL lesson : Effects of plastics on earth.

Students will have to choose 4 different plastic waste (a bottle, a bag, microplastic and a food packaging). After that they will have to search the impact of their waste on the environment and how to reduce our impact on earth, in the end the students will have to present their work.

Work by groups of 4 or 5

Time for activity : 40 minutes for the research and 15 minutes for the oral presentation
