

## School Gardens( activity 9)

We have recorded a video to show other partners where our school is located, a description of our rural environment. The landscape changes according to the season, so we have chosen some photos to describe them with accuracy.

Our school also has an orchard where our disabled students work on it, they plant many plants which later on they will cook in the kitchen. They Have different subjects such as The Orchard, Gardening and Cooking.

We also often go to the orchard to learn maths, science and so on. We think it is important to take care of our environment for our future.

You can have a look to our video in the following link:
