

My experience at Erasmus +

Hello! My name is Maria Ghobour and I am a student in the seventh grade at School "Princess Margareta".

I have been a volunteer in the international project "Erasmus + " since I was in the sixth grade. We have an hour per week to help some children learn English. Every hour, our English teacher comes and gives us the theme. By now our themes were: present simple, present continuous, regular and irregular verbs, past simple, present perfect, past perfect simple, conditionals 0 and conditional 1, etc.

At the beginning of the hour we write the theory, then we help them understand the lesson better and in the end we do exercises. We give them the lesson at home to learn it better and that's all. After all we do, not just the children learn something new or something they didn't know, we all learn something new.

I love helping children and seeing them improving. I love to share my knowledge with others and make them understand me. In my opinion these volunteering hours are good for all, not just for children.

I hope I will make a part of this project " to the end of the story".
