

## My experience at Erasmus +

I started volunteering at Erasmus + two years ago, because I wanted to help my mates and I like to do volunteering very much. In the first year, we made projects and my project was selected. In the second year, we started helping our mates. I am helping my mate. At first, it was hard, because it was the first time when I helped someone and for my mate it was hard, too, because nobody helped her, until then. But now, it is better. My mate understands all I explain. I hope that my effort is worth!

This programme helps me know different cultures and different people. Also, this programme tests my English in different situations.

I like to do volunteering for Erasmus + because I have the chance to make a lot of new friends!

Thank  
you!
