

Volunteering

- My experience in volunteering -

Volunteering is an activity, a work that you do for yourself and for the others to help them in different ways, without being paid.

you can be volunteer in different domains like: social services, cultural, education, humanitarian, sports, environment protection and many more. There are many reasons to become a volunteer: to gain experience, to make new friends, to learn new things, to feel useful, to have fun, to have a responsibility, to be part of a team, to understand better the community problems.

I am a volunteer and I'll probably be a volunteer many years from now, maybe all my life. I help students to learn more at different subjects like English. I'm so happy when I see them making progress at this subject and I'm sure they're happy, too. I am also part of a volunteering organization named "TEAM". They teach us how to talk to children and many games we can play with them. I take part in hours of play with small children at my school. It's an unique experience to see their smiles and happiness. It's also an unique feeling when they hug us and tell us that they love us.

In the future, I want to get involved in many more volunteering project. I want to help people, I want to make them smile and I want to make something useful for the world I live in.

I'm so proud of all my experience in volunteering till now!
