

Peer – learning method

I like helping young students. At first I thought it was going to be boring or a waste of time but after a couple of hours helping the young kids I thought it was nice. The first time there was so many volunteers we couldn't even all go into three separate classrooms. I'm glad to help the kids alongside my best friends. After a long time the kids already knew me and were happy when I came. I helped the students in their maths, Slovene and other homework. Sometimes I helped more than just one student and had to walk around the classroom looking for students in need of help. Helping the students takes me some time after school but I don't mind it. I also like to help students because you learn what they do in school and it reminds you what you did when you were as young as the students.

Všeč mi je pomagati mladim učencem. Sprva sem mislil, da bo dolgočasno ali zapravljanje časa, vendar po nekaj urah pomaganja mladim otrokom sem mislil, da je lepo. Prvič je bilo toliko prostovoljcev, da nismo mogli vsi iti v tri razrede . Vesel sem, da lahko pomagam otrokom ob mojih najboljših prijateljih. Po dolgem času so me otroci že poznali in so bili veseli, ko sem prišel . Pomagal sem učencem pri njihovi matematični , slovenski in drugi domači nalogi . Včasih sem pomagal več kot le enem učencu in sem moral hoditi po razredu ter iskati učence, ki potrebujejo pomoč. Pomagati učencem mi je vzelo nekaj časa po šoli, ampak me to ne moti. Všeč mi je tudi to, da pri pomaganju učencem izveš, kaj delajo v šoli in te to spomni, na kaj si delal kot še mlad učenec.

Tim Vrečič, 9.a
