

New year

New year is also called Saint Sylvester's Day. Already in december, many people decorate trees in their homes. New year is a special holiday, which we celebrate at midnight. At this time the year turns into in a new one. When the clock rings midnight, the whole country puts fireworks. The first country celebratig New Year is Sydney. In bigger cities they prepare the biggest fireworks. For this holiday people invite their relatives and friends and at midnight they open a bottle of champagne and toast to New year. Some people celebrate outside, in town squares however with fireworks, dancing, singing and having fun, saying good wishes for the New Year. Until the year 2012 the second of January was a national holiday and a free day. Some religions celebrate New year maybe sooner or later. I celebrate the New Year's Eve with my relatives and family, normally at home. At midnight we wish good health to each other. When the fireworks finish, we go to neighbours and wish them happiness and health in the New year. For me it is a special holiday because we are free of school and have holidays.

Novo leto

Novemu letu se drugače reče tudi silvestrovo. Novo leto je poseben praznik, ki ga praznujemo ob polnoči. Takrat se eno leto previje v drugega. Ko odbije polnoč celo državo prelijejo poki ognjemetov. Med prvimi praznuje novo leto mesto Sydney .V večjih mestih pripravijo ogromne ognjemete. Nekateri za ta praznik povabijo k sebi sorodnike in prijatelje in ob polnoči odprejo šampanjec in nazdravijo novem letu. Nekateri pa se odpravijo v večja mesta kjer imajo ognjemete in novo leto proslavijo tam. V Sloveniji je novo leto državni praznik. Do leta 2012 je bil 2. januar tudi dela prosti dan. Novo leto nekatere vere praznujejo kasneje ali prej. Jaz novo leto praznujem skupaj z mojimi sorodniki in družino. Ko pa ura odbije polnoč skupaj nazdravimo in nato prižgemo rakete. Ko je konec ognjemetov gremo še sosedom zaželeli srečno in zdravo novo leto. Zame je novo leto poseben praznik saj smo prosti in imamo tudi malo počitnic. In to je tudi praznik, ki ga praznujemo ob polnoči.
