

## VRSTNIŠKO UČENJE

Vrstniško učenje je medgeneracijsko prostovoljno delo učencev, pri katerem drug drugemu pomagajo s svojim znanjem in izkušnjami. Je zelo dobra metoda, s katero se otroci lahko veliko naučijo. Vrstniki poslušajo, se pogovarjajo in z ustrežno motivacijo naredijo svoje naloge.

Vrstniško učenje mi je zelo všeč in rad pomagam mlajšim otrokom. Pri pomoči učencem otroki opažam, da hitreje in z veseljem naredijo domače naloge in so veliko bolj pripravljeni za učenje. Takrat veliko sprašujejo, da bi čim bolj izkoristili vrstniško učenje in videli ali so rešili nalogo pravilno.

## PEER LEARNING METHOD

Peer learning method is a volunteering activity of pupils in which one can help others with their knowledge and experiences. It is a very good method in which children can learn a lot. It requires hard work, listening, talking and attention. I really like peer learning method and I like helping younger children. With helping the kids I see that when I was there and dealt with them, they did their homework with joy and they were much more eager to learn. At that time, they asked a lot to take advantage for peer learning method and checked if they did their work correctly.
