

LITHUANIA THROUGH MY EYES

Lithuania is a small country but it still has a lot to offer. From beautiful landscapes to this united and welcoming school Ylakiai gymnasium.

Let's start with the weather. It was cold but the experience of seeing the snow was just amazing. For some of us, this was the second time seeing it in our whole life. So we are thankful for this experience. Even though the weather was really cold, people here made us feel really warm. It was nice to meet all of the friendly people that welcomed us here. They welcomed us with beautiful performances and introduced us with traditional dances. For us to get to know each other they prepared warm-up activities which were really fun. It was also interesting to see landscapes like this because in Italy or Portugal you can't see plain fields which make everything look really peaceful. The food was new to us so we weren't used to these tastes but it was still not that bad. But it's sad that we couldn't try more traditional foods like cepelinai. But nevertheless we will leave Lithuania with good memories and experiences.

Roses are red,
Violets are blue,
Lithuania is great,
And this is true.
