

SURVEY ABOUT CLIMATE CHANGE OR GLOBAL WARMING

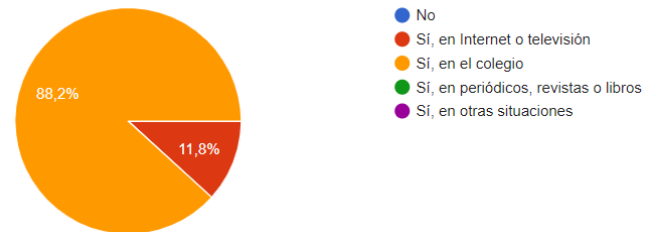

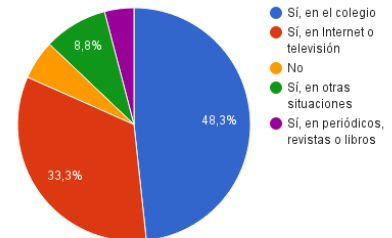

RESULTS

This survey was answered by 150 students aged 9, 10 and 11 in November 2016
And by the same students with 9 years in Mai 2019

1.- Have you heard about climate change or global warming?

- No
- Yes, by Internet /TV
- Yes, at the school
- Yes, by newspapers, magazines and books
- Yes, in others situations

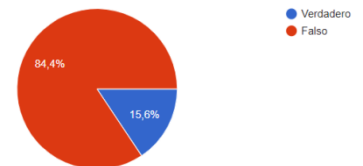

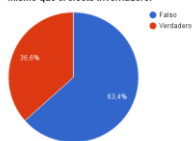

Recuento de 1.- ¿Has escuchado hablar del cambio climático o calentamiento global?

2.- Answer True (T) or False (F)

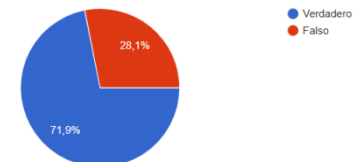

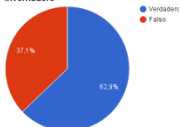

FALSE Climate change is the same as the greenhouse effect

Recuento de 2 a: El cambio climático es lo mismo que el efecto invernadero.

TRUE Climate change is caused by an increased greenhouse effect

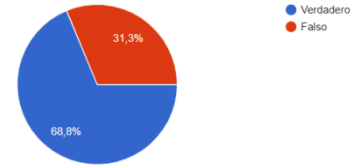

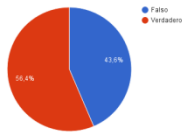

Recuento de 2 b: El cambio climático está ocurriendo por un aumento del efecto invernadero

FALSE

The greenhouse effect is caused by climate change

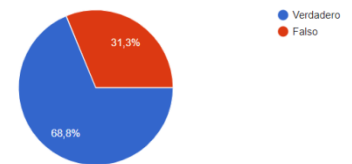

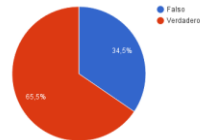

Recuento de 2 c: El efecto invernadero está producido por el cambio climático

FALSE

Climate change is due to the reduction of the ozone layer

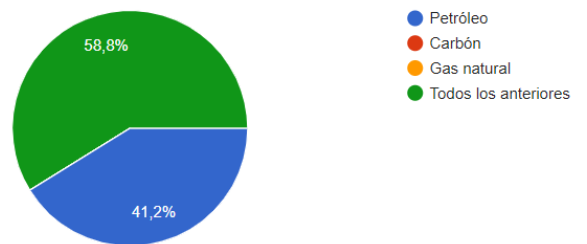

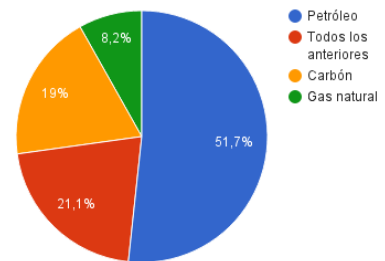

Recuento de 2 d: El cambio climático es debido a la reducción de la capa de ozono

3.- Which of the following are fossil fuels?

- Oil
- Coal
- Natural gases
- All of the above

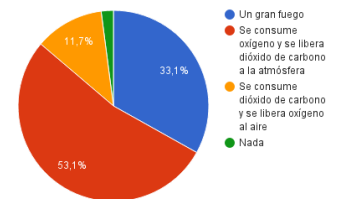

Recuento de 3.- ¿Cuáles de los siguientes materiales son combustibles fósiles?

4.- What happens when we burn fossil fuels?

- Nothing
- A huge fire
- Oxygen is consumed and carbon dioxide is released into the atmosphere
- Carbon dioxide is consumed and oxygen is released in the air.

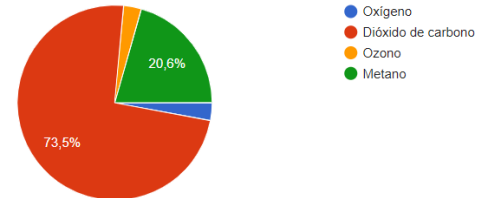

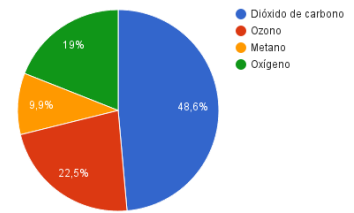

Recuento de 4.- ¿Qué ocurre cuando se queman combustibles fósiles?

5.- Which it is the main greenhouse gas?

- Oxygen
- Carbon dioxide
- Ozone
- Methane

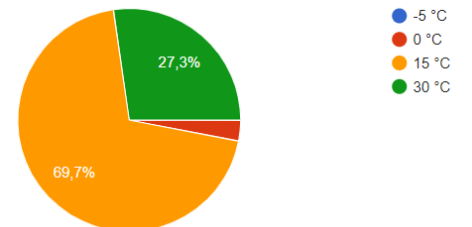

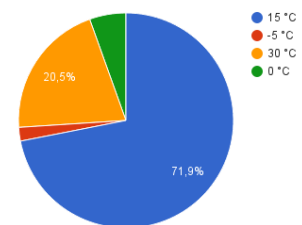

Recuento de 5.- ¿Cuál es el principal gas de efecto invernadero?

6.- What do you think is the most ideal (average) temperature for the Earth?

- 5 °C
- 0 °C
- 15 °C
- 30 °C

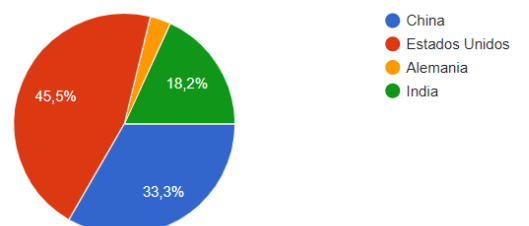

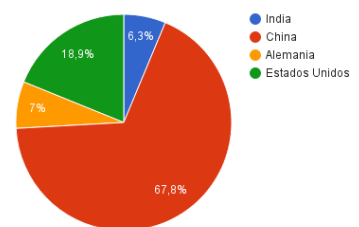

Recuento de 6.- ¿Cuál crees que es la temperatura media ideal para el planeta Tierra?

7.- Which country currently emits the most greenhouse gases?

- China
- United States
- Germany
- India

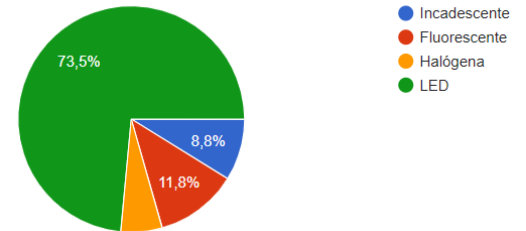

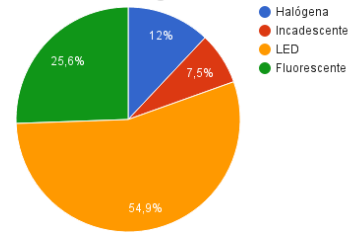

Recuento de 7.- ¿Cuál es el país que emite actualmente más gases de efecto invernadero?

8.- Which of the following lightbulbs uses the least energy, and therefore results in fewer greenhouse gas emissions?

- Incandescent
- Compact fluorescent
- Halogen
- LED

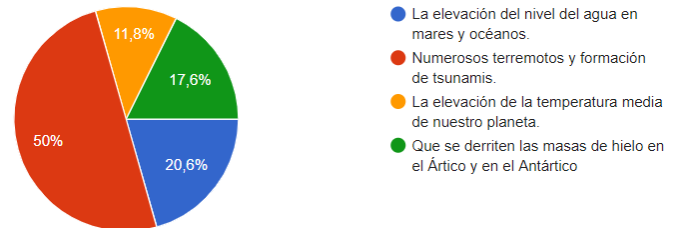

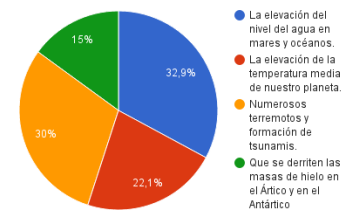

Recuento de 8.- ¿Cuál de estas lámparas o bombillas gasta menos energía y, por tanto, menos emisión de gases de efecto invernadero?

9.- Select the false answer. The result of the greenhouse effect is:

- The raise of the water level in seas and oceans.
- Numerous earthquakes and the formation of tsunamis.
- The raise of the average temperature of our planet.
- The melting of glaciers in the Arctic and Antarctic.

Recuento de 9.- Cual de los siguientes hechos no está provocado por el efecto invernadero:

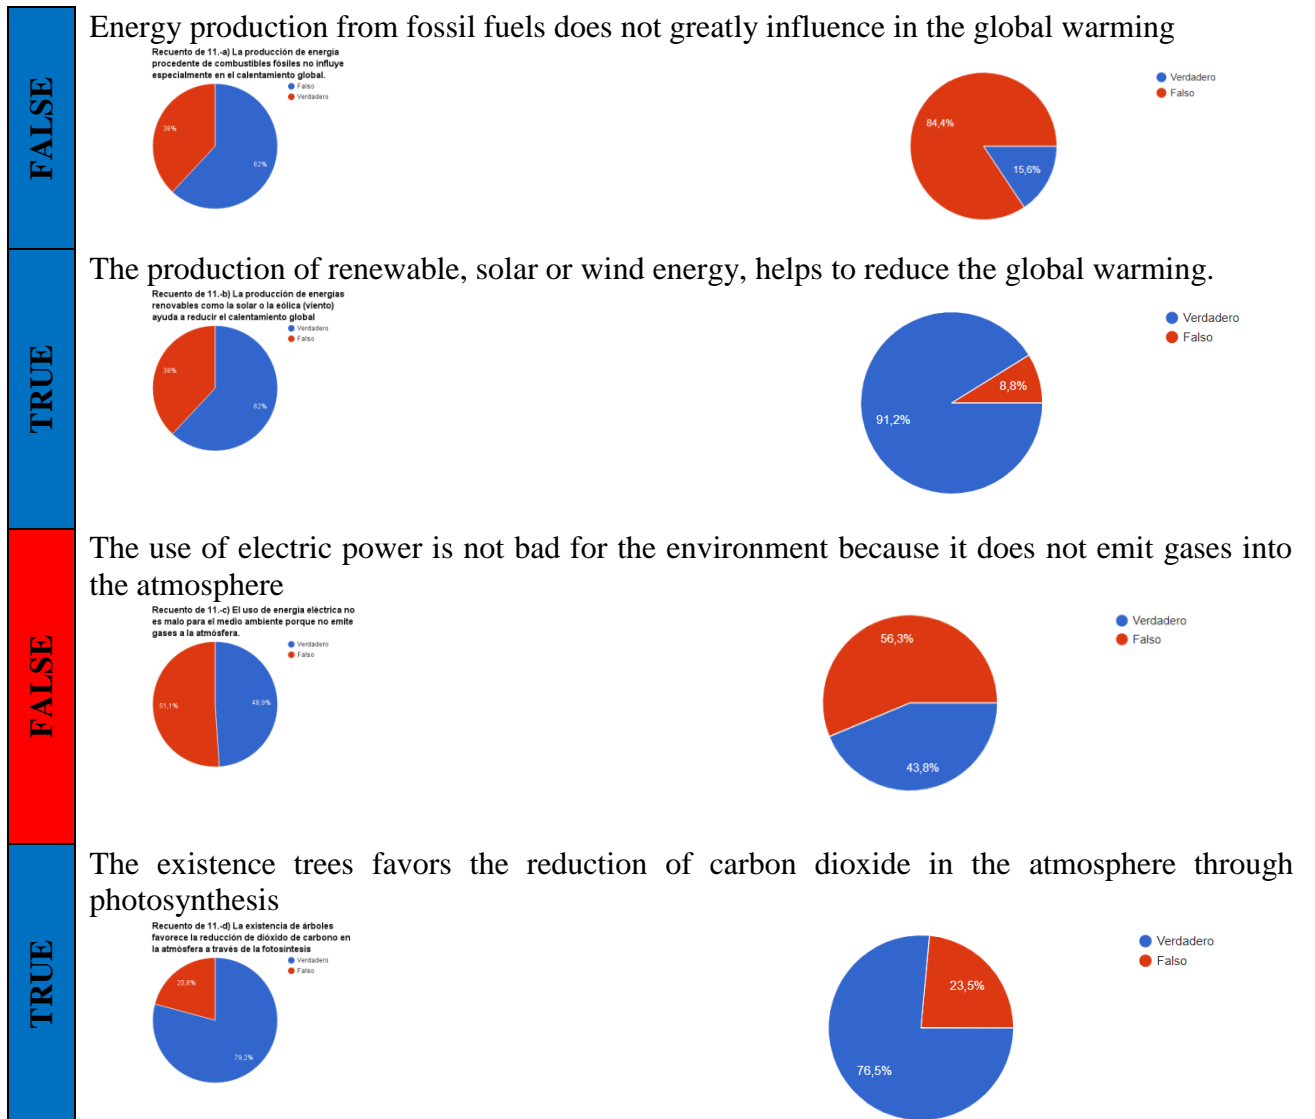

10.- And what about rain? Mark the correct option.

- In many places it is increasing but becoming more torrential. And others are declining.
- In general it is declining across the Earth.
- No relationship between global warming and rain

Recuento de 10.- ¿Y qué pasa con las lluvias?

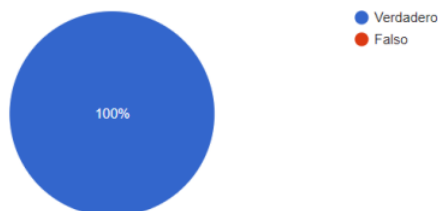

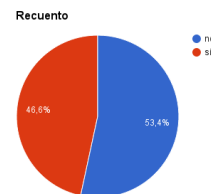

11. Answer True (T) or False (F)

12.- Have you ever done anything consciously to reduce the effects of climate change?

 No
 Yes, for example:

Thank you very much
