

SURVEY ABOUT CLIMATE CHANGE OR GLOBAL WARMING Guadeloupe's results

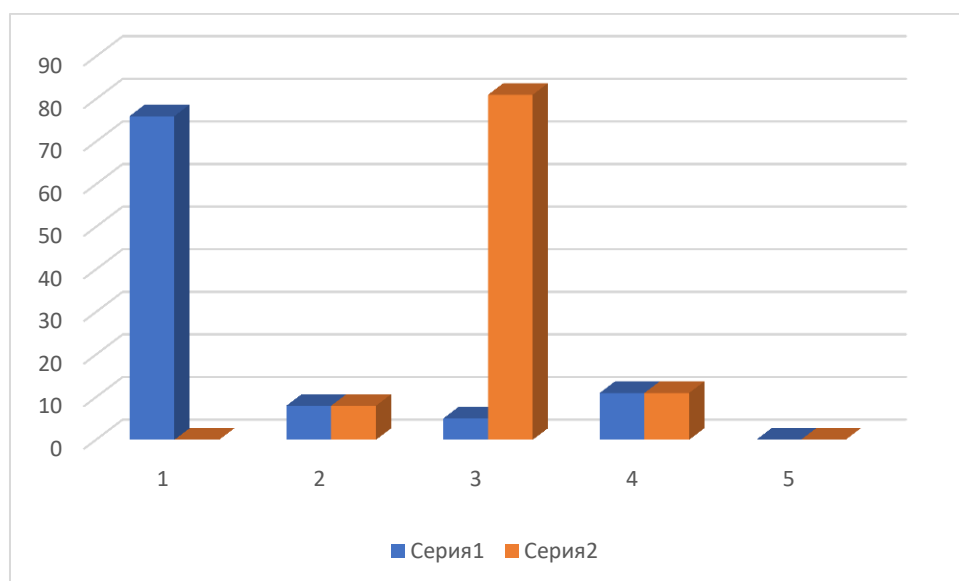

This survey was presented to 100 people (students, parents, teachers)

Serie 1: October 2016

Serie 2: March 2019

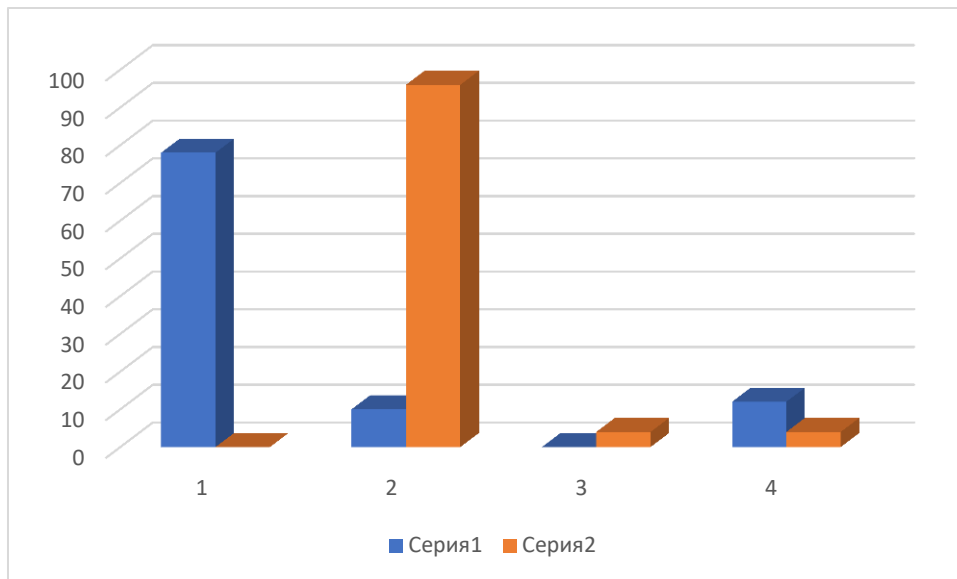

I.- Have you heard about climate change or global warming?

- | | |
|---|---|
| 1 | No |
| 2 | Yes, by Internet /TV |
| 3 | Yes, at the school |
| 4 | Yes, by newspapers, magazines and books |
| 5 | Yes, in others situations |

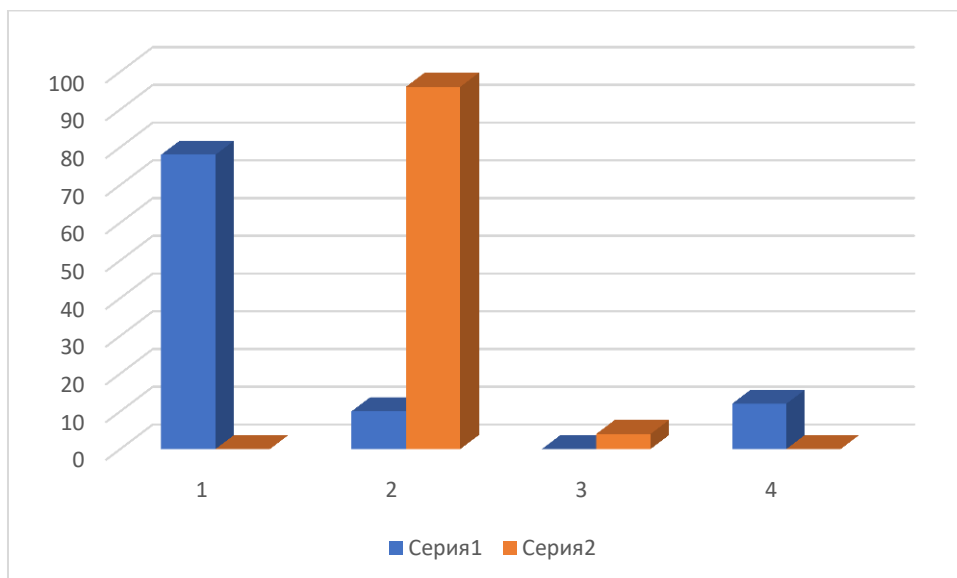

II.- Answer True (T) or False (F)

- | | |
|---|--|
| 1 | Climate change is the same as the greenhouse effect |
| 2 | Climate change is caused by an increased greenhouse effect |
| 3 | The greenhouse effect is caused by climate change |
| 4 | Climate change is due to the reduction of the ozone layer |

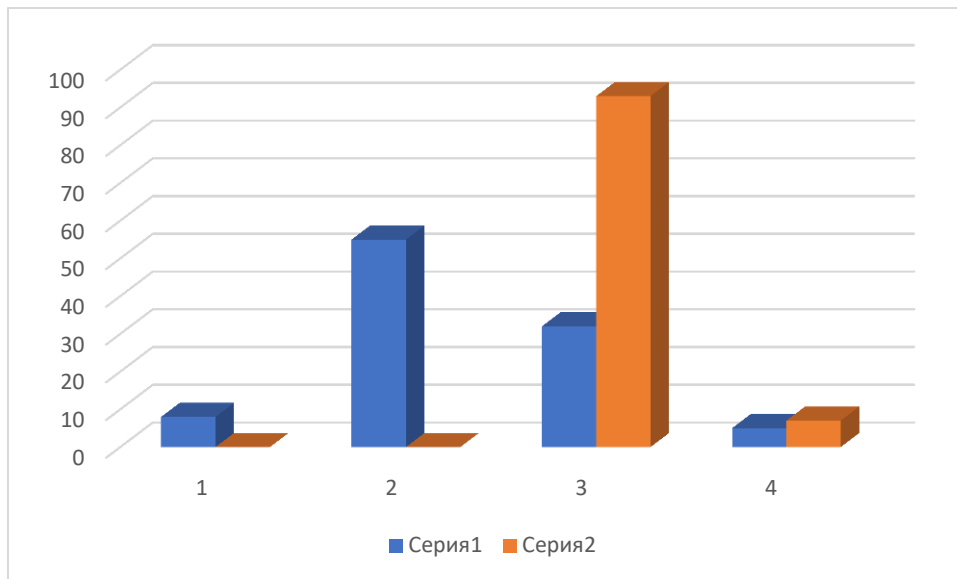

III.- Which of the following are fossil fuels?

- | | |
|---|------------------|
| 1 | Oil |
| 2 | Coal |
| 3 | Natural gases |
| 4 | All of the above |

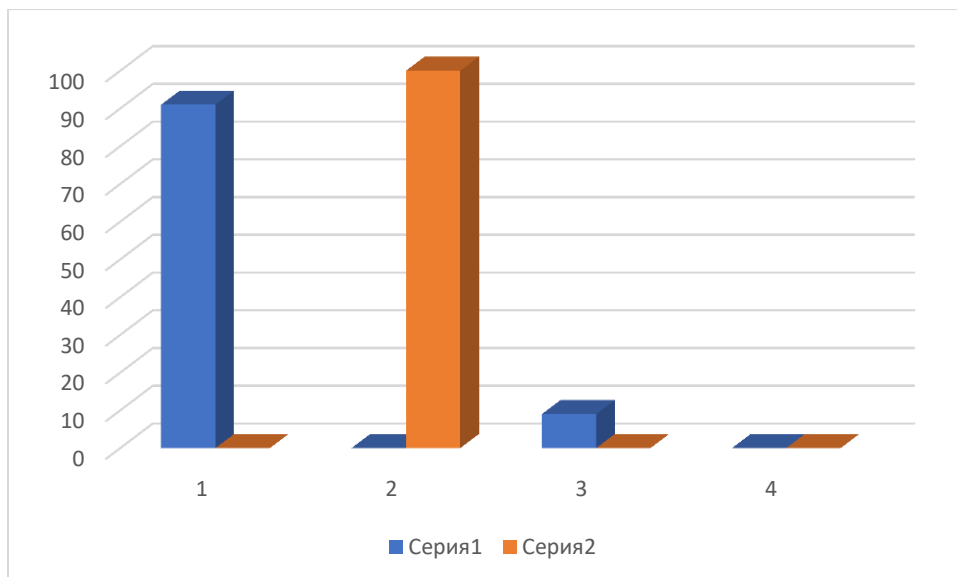

IV.- What happens when we burn fossil fuels?

- | | |
|---|---|
| 1 | Nothing |
| 2 | A huge fire |
| 3 | Oxygen is consumed and carbon dioxide is released into the atmosphere |
| 4 | Carbon dioxide is consumed and oxygen is released in the air. |

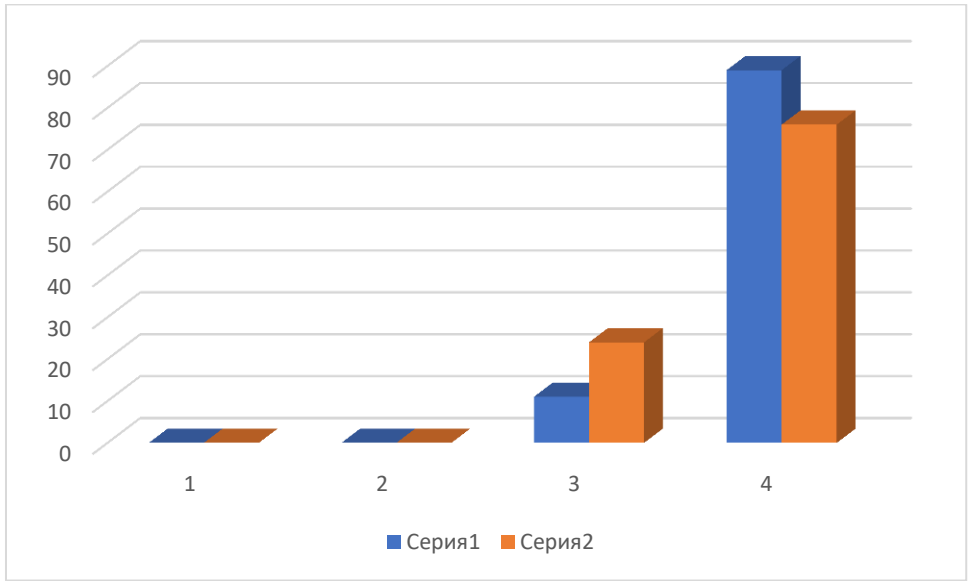

V.- Which it is the main greenhouse gas?

- | | |
|---|----------------|
| 1 | Oxygen |
| 2 | Carbon dioxide |
| 3 | Ozone |
| 4 | Methane |

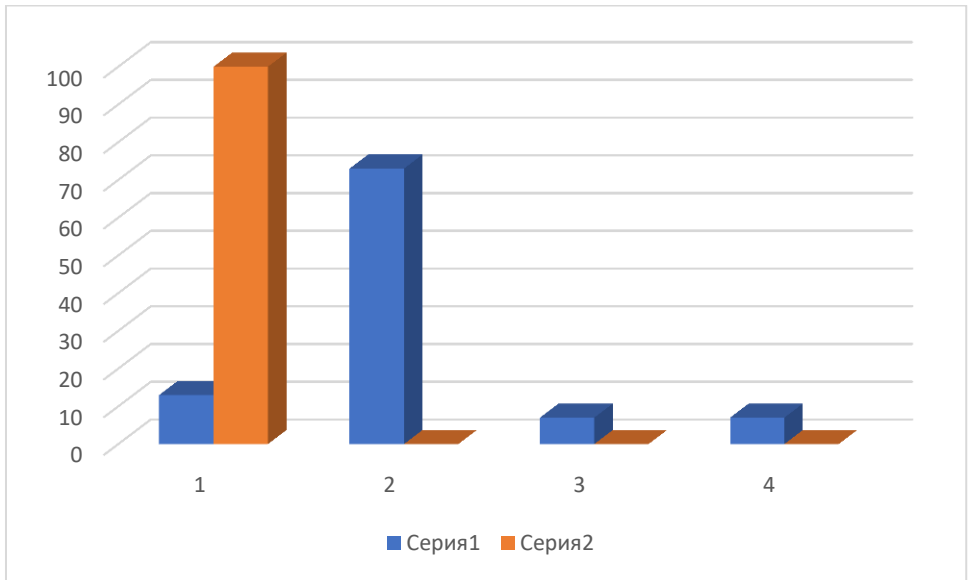

VI.- What do you think is the most ideal (average) temperature for the Earth?

- | | |
|---|-------|
| 1 | -5 °C |
| 2 | 0 °C |
| 3 | 15 °C |
| 4 | 30 °C |

VII.- Which country currently emits the most greenhouse gases?

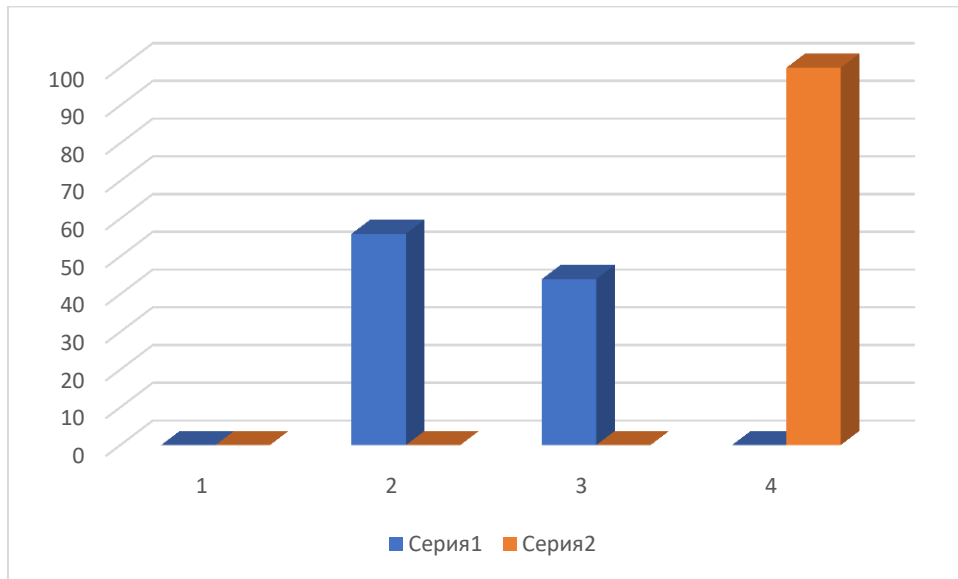

- 1 China
- 2 United States
- 3 Germany
- 4 India

VIII.- Which of the following lightbulbs uses the least energy, and therefore results in fewer greenhouse gas emissions?

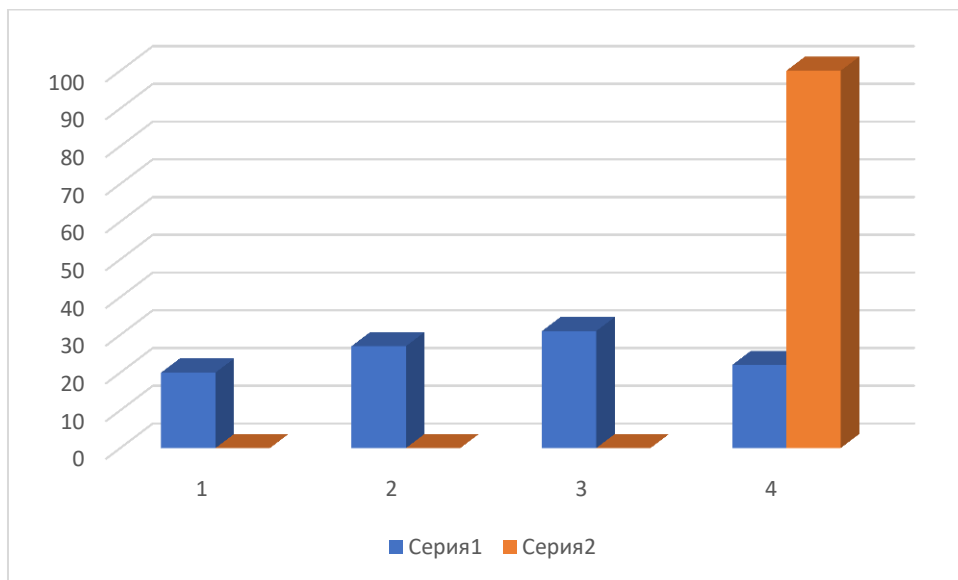

- 1 Incandescent
- 2 Compact fluorescent

- 3 Halogen
- 4 LED

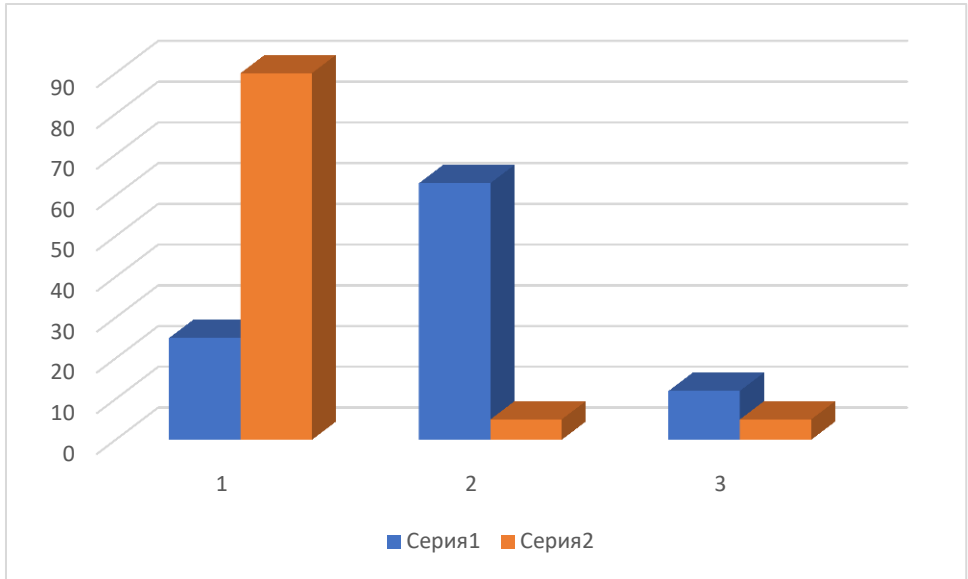

IX.- Select the false answer. The result of the greenhouse effect is:

- 1 The raise of the water level in seas and oceans.
- 2 Numerous earthquakes and the formation of tsunamis.
- 3 The raise of the average temperature of our planet.
- 4 The melting of glaciers in the Arctic and Antarctic.

X.- And what about rain? Mark the correct option.

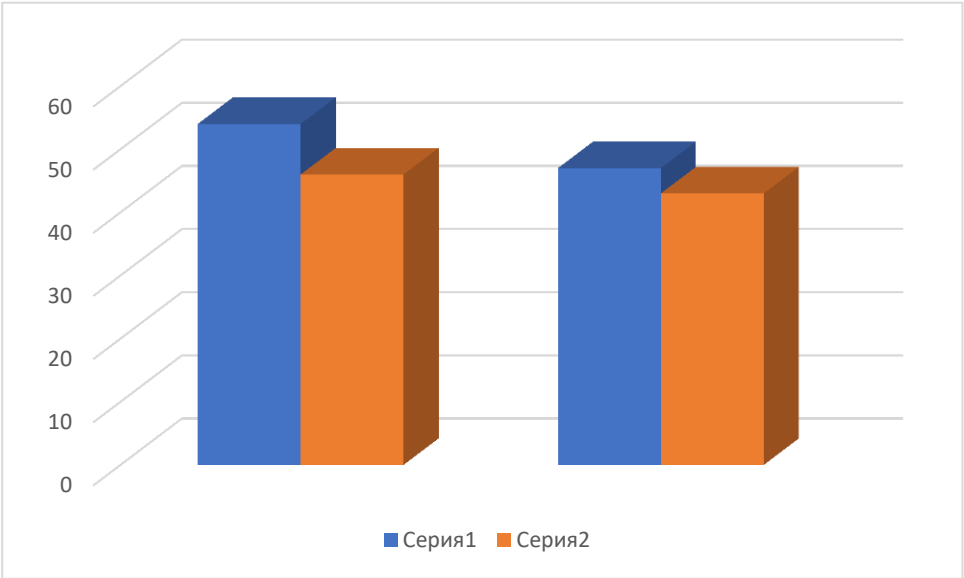

- 1 In many places it is increasing but becoming more torrential. And others are declining.
- 2 In general it is declining across the Earth.
- 3 No relationship between global warming and rain

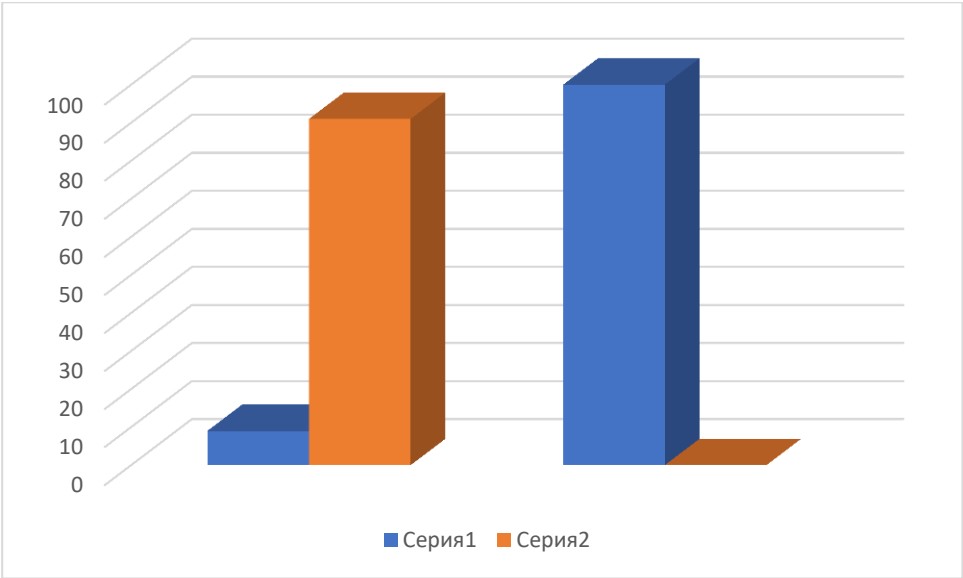

XI. Answer True (T) or False (F)

TRUE / FALSE

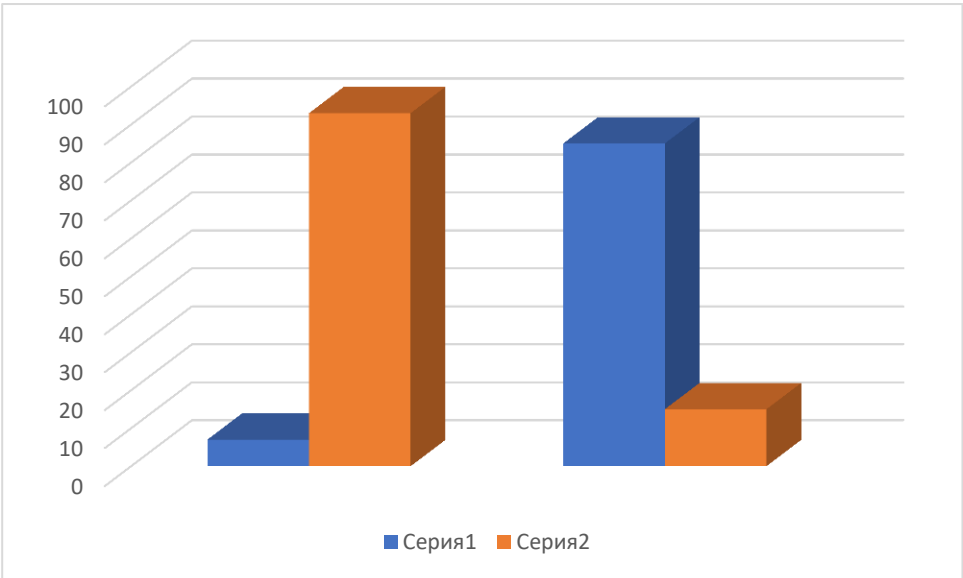

1 Energy production from fossil fuels does not greatly influence in the global warming

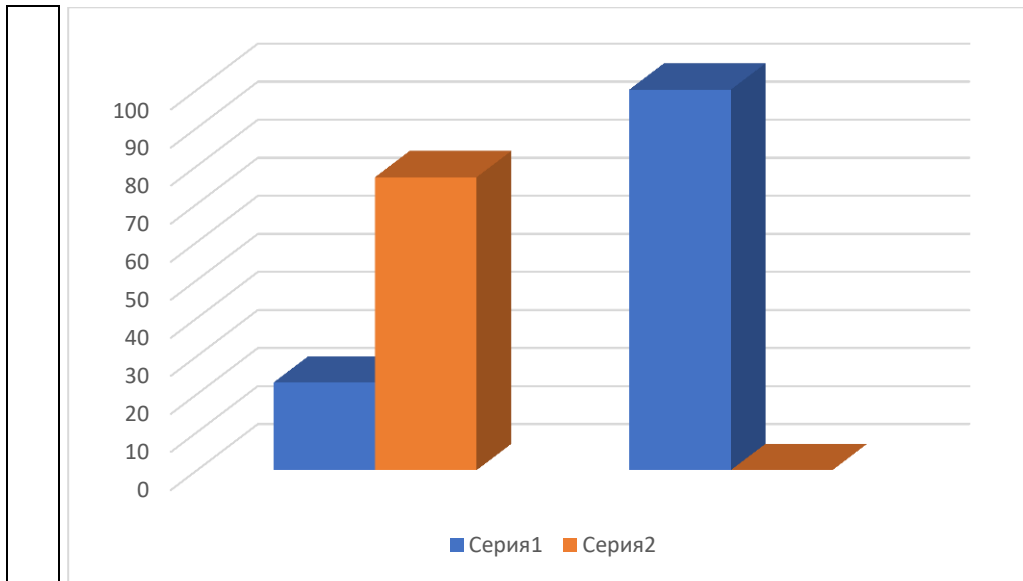

2 The production of renewable, solar or wind energy, helps to reduce the global warming.

3 The use of electric power is not bad for the environment because it does not emit gases into the atmosphere

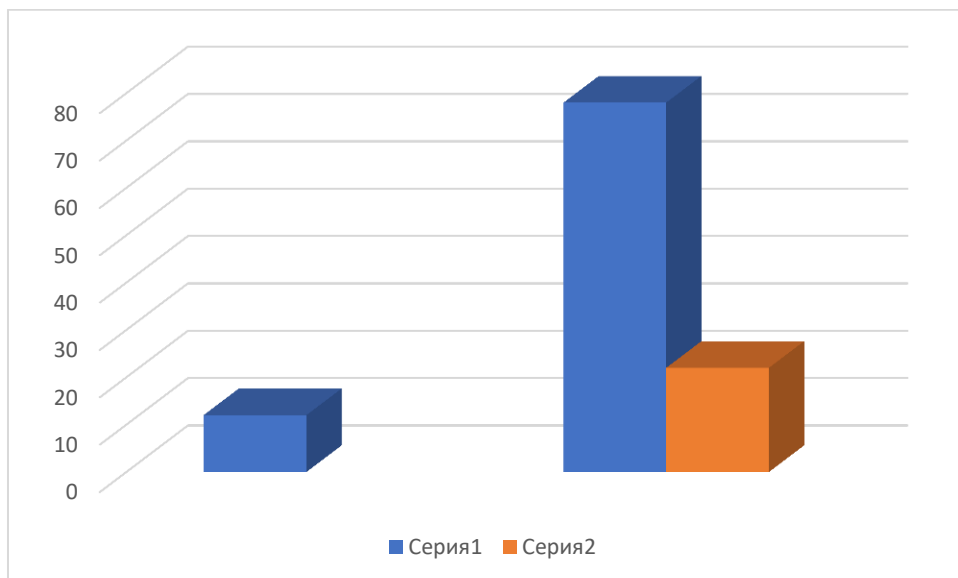

4 The existence trees favors the reduction of carbon dioxide in the atmosphere through photosynthesis

XII.- Have you ever done anything consciously to reduce the effects of climate change?

YES / NO

	No
	Yes, for example:

Answers for YES:

2016:

Walking 7
Save energy 7

2019:

Walking 83
Save energy 96
Use solar panels 41
Use LED ... 10

Thank you very much
