

Erasmus+

The results of the Ecoaudit surveys led to a new project for 2019

Our Challenge for 2019:

Improve our recycling system!

Step 1

We have to improve the equipment of our school:

- We need: a bin of each color in every classroom
- We need: a symbol that shows what type of waste it is
- We need: big dustbins for the schoolyard

Step 1

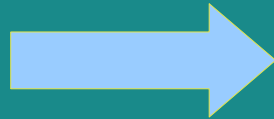

- We have to improve the equipment of our school:
-
- We need: a bin of each color in every classroom ✓
- We need: a symbol that shows what type of waste it is ✓
- We need: big dustbins for the schoolyard ✗

In process

Step 2

One class worked
on a video !

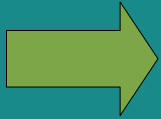

The video explains:

- Why should we recycle?
- What happens to the waste?
- What do other young people do against the climate crisis?

Step 3

Every class of the school will watch the video and work on the questions

- Every group will get texts and the video for the subject *ethics*
- This way we hope to **motivate** the whole school to **recycle better** but also to **produce less waste!**

We will keep on working it!

Thanks for your attention!
