

FOREST AGENTS

Valencian Government Environment Department

- **What they do?**

The forest agents have very diverse functions, among them there are the following functions:

Conservation of environment, like control improvement work in the mountains

Make water quality controls and control the spills into the environment

Inform and participate in the prevention of forest fires

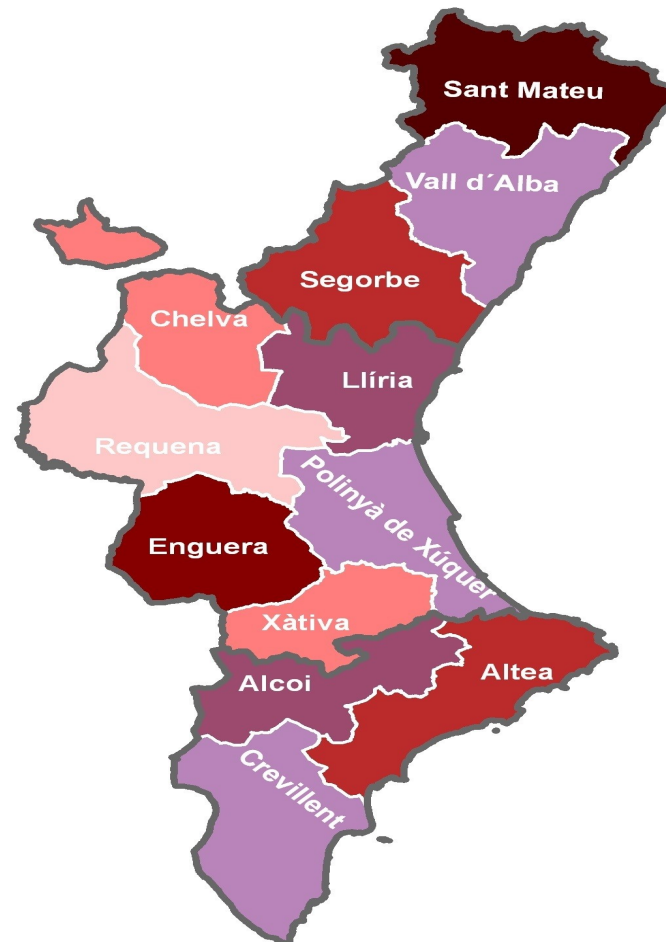

Control furtive hunting

- **Where we can find them?**

Its distribution in the territory of the Valencian Community is based on the forest demarcations, that group several regions.

At administrative level they are organized in Regional Offices of Environment (OCMA)

FORESTRY TRAINING

- **There are many different levels of training to be forest agent but these are the most important.**

Middle Degree Forestry and nature conservation

Higher Degree Forestry work and conservation of the natural environment

FOREST VOLUNTEERS

- **If you are not interested to study any of these careers you can be volunteer.**

- **Who can be volunteer?**

Any person over 18 years old can be volunteer.

What are the requirements to be voluntary?

The only one requirement is that the person who want be volunteer must know their obligations as a volunteer and participate in activities

- **CHARACTERISTICS OF FOREST VOLUNTARY**

The voluntary people will carry out monitoring of the mountains and information to users against the risk of forest fires.

They must be over 18 years old and have a minimum of physical capacity for the performance of the activity, to make a walking route of about 7 to 10 km along the tracks and forest paths.

- **PERSONAL COMMITMENT OF VOLUNTEERS AND VOLUNTEERS**

Collaborate uninterestedly during the availability period

Accept a minimum commitment of 10 days a year

Participate actively in activities

Respect basic rules of forest fire prevention (don't shed cuils or cigarettes, don't make fire)

These are some of the characteristics and commitments of the volunteers
