

Erasmus+

EURECO

We have to take care of the planet we live on because if it's destroyed once, it cannot be rebuilt.

What does EURECO do?

E-Box

Our biodegradable everything box

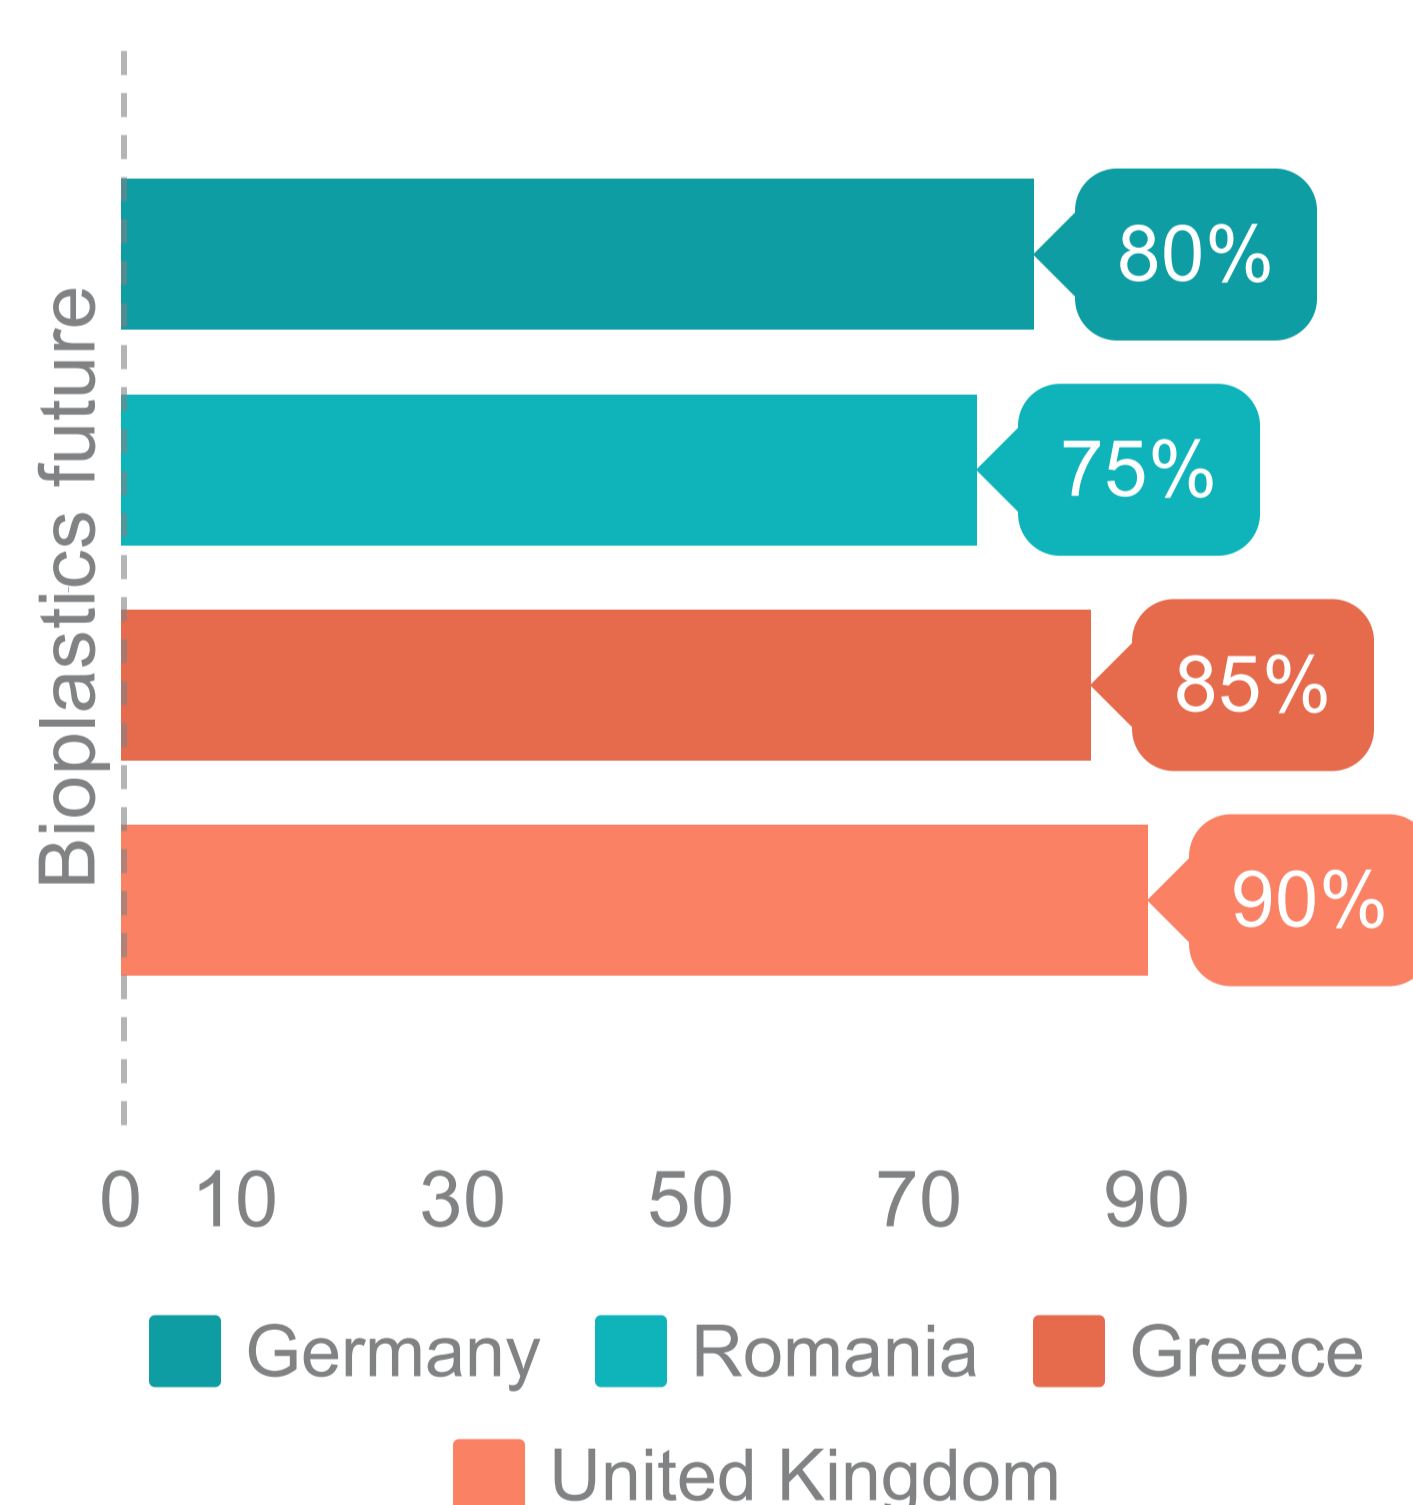

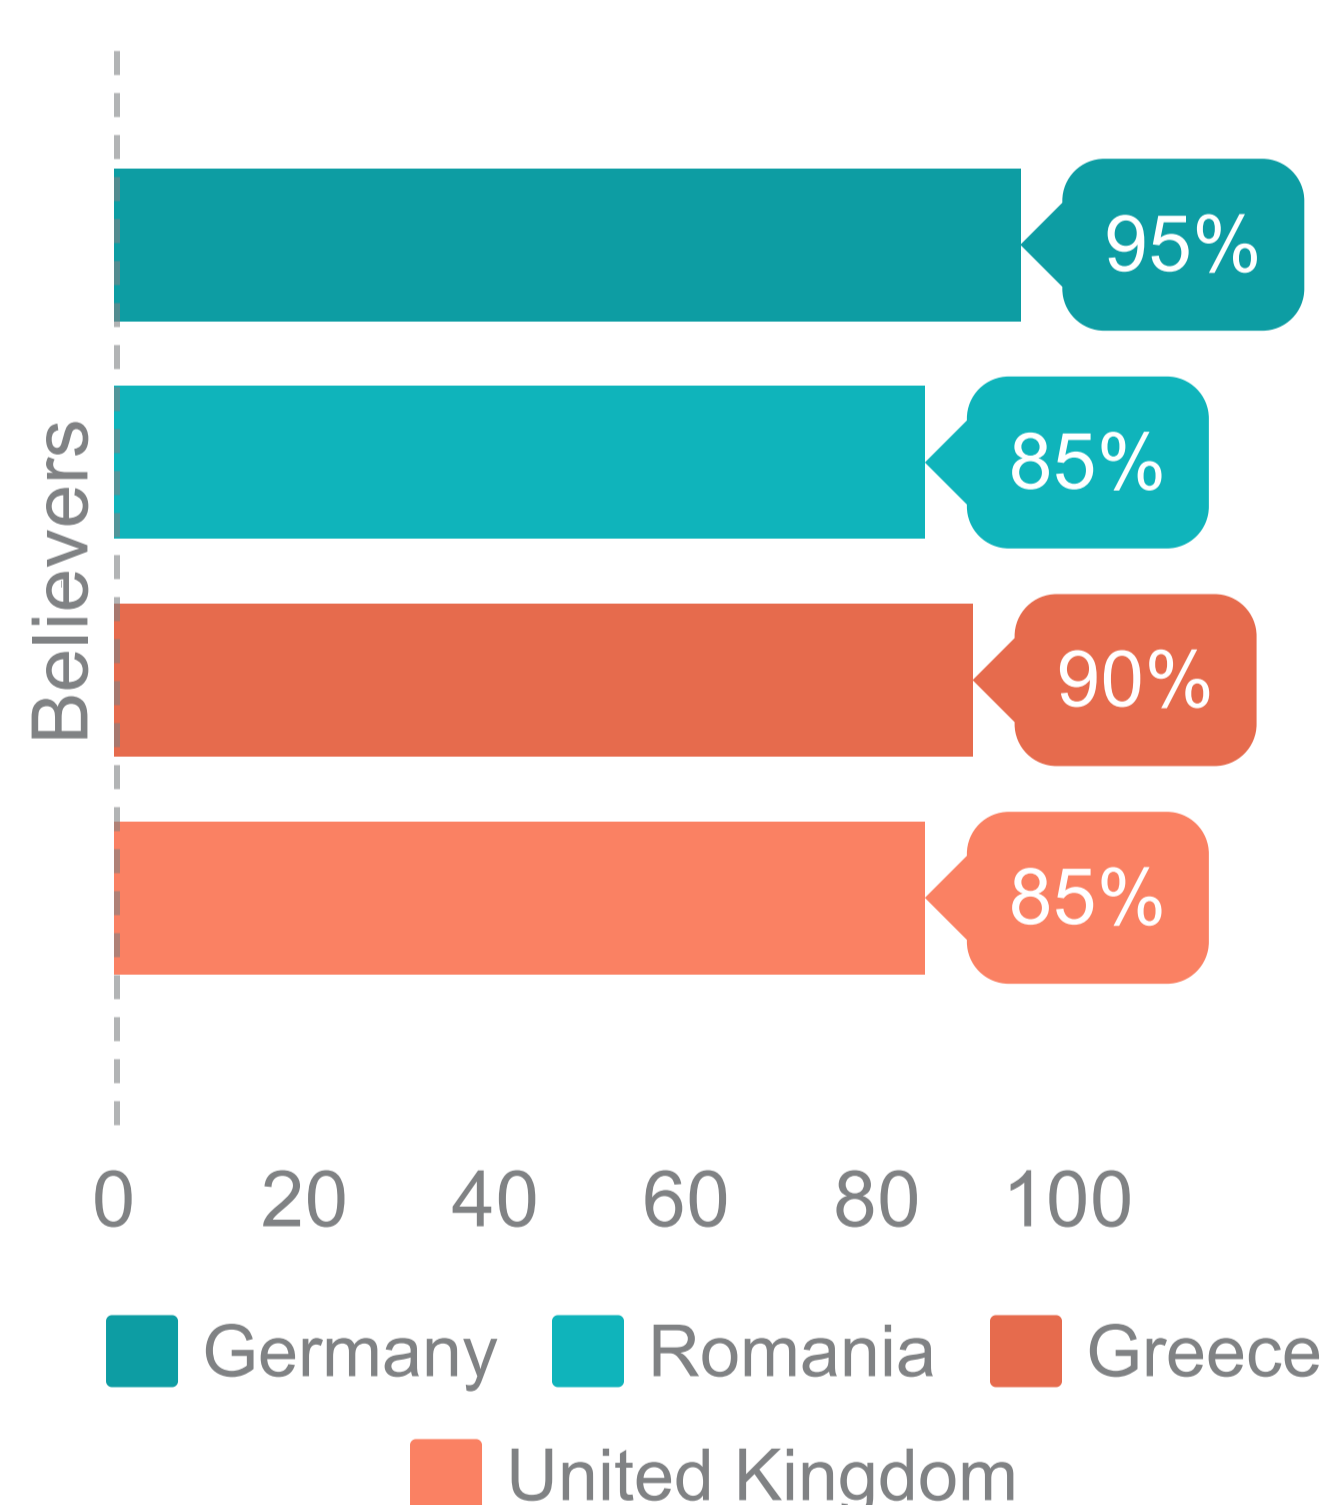

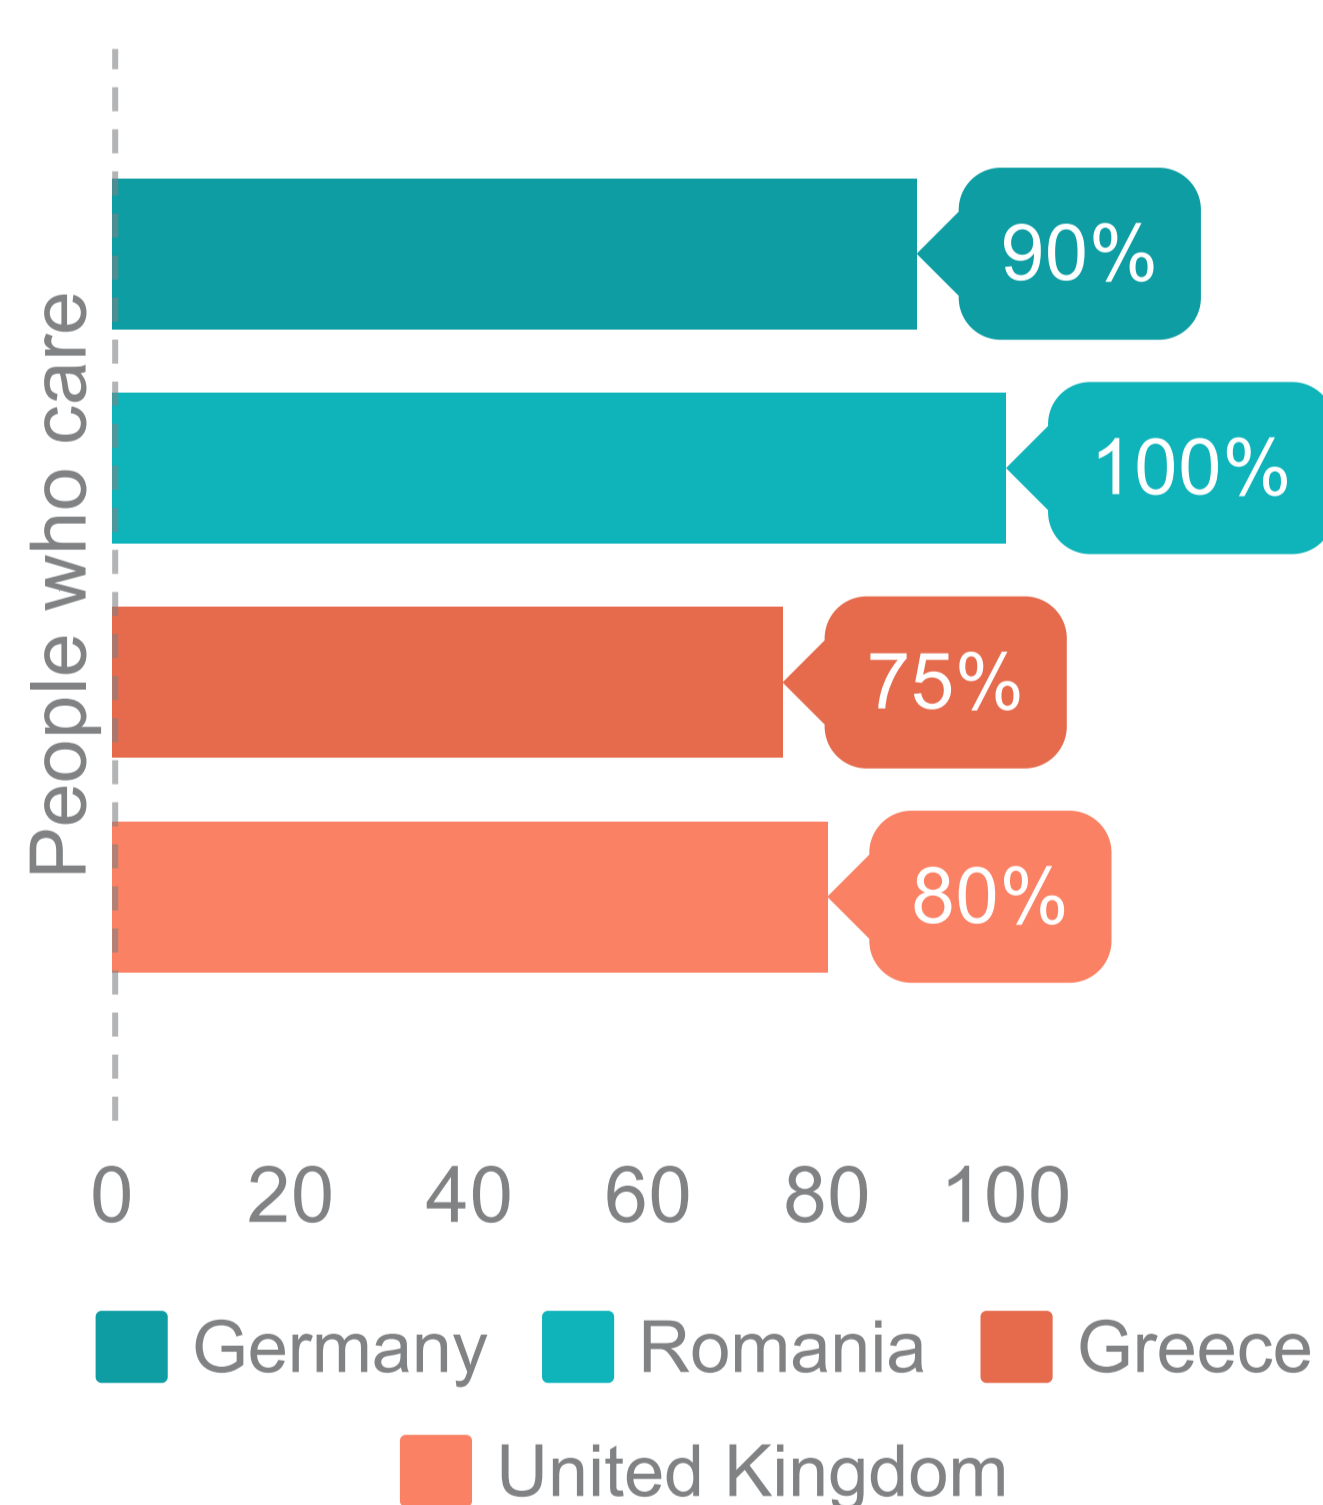

Locations

-We will work as a binder between all of the departments, tertial companies and factories in order to get the bioplastic from the production point to the customer and then recycle it properly using its degradable properties.

Market analysis

How many people care about the environment?

So,

we have the chance to change the world in an ecologic way!

How many people think the E-Box will win the market?

So,

our product meets people's interest and could be a future top seller.

How many people think bioplastics are the future of packaging?

So,

with this general motivation we can reach our aim to replace plastics with bioplastics in the whole EU.
