9 Stones

Four thousand years old Turkish intelligence and strategy game 9 stones:

It is a known fact that the Turkish nation has one of the world's oldest and most important cultures. Our language and cultural assets and the depth of our history clearly reveal this.

New research reveals that the Turks have a say in strategy and intelligence games.

The most concrete example of this is the nine stone game that is practiced in very few Turkish countries today.

This game clearly shows that our nation is the inheritor of an ancient and a high culture. But unfortunately, like many of our values, many of us are unaware of the existence of an intelligence and strategy game, which has a history of four thousand years and is kept alive among Kazakh Turks as "togaz kumalak", namely nine kumalak.
