My father loves to help my mother, he shows it when she is tired from work and he cooks various dishes. He also likes to walk with my sister and helps my mother so much, because during this time she can clean the apartment or if there is a lot of work to be able to finish it and then all play with my sister. Honestly, it is rare for my mother to walk the child and my father and I to clean the house, because we both hate to clean. I also help my mother by cooking two or three things and taking care of the child while she works.

The development of technology allows the father to gladly help mom.

- My father loves to cook and sometimes clean. He loves to cook moussaka, different types of beans and soup. My father sometimes cleans the dust at home, because that's how he helps my mother, and he likes to help her.
- With the help of new technologies it becomes easier and faster and that is why my father loves to help at home.

My father:

- clean with a vacuum cleaner
- cook (sometimes)
- stretches clothes
- wash clothes

And in general it helps a lot in the household.

My father doesn't help with housework very often because he is at work. But it happens that he participates in the preparation of dinner, throws out the garbage, collects clothes and goes shopping.

My father often helps with the housework. He loves to cook. He cooks almost every week, and his favorite food is an omelet. We do something every holiday. On Christmas - cookies, on Easter - Easter cakes, on Christmas Eve - bread. Every time he cooks, there is a big cleaning in the kitchen.
