After lunch I had to come back in my service

things and it was funny.

First I did my training course in maïson Blanche hospital in Reims from 17th January to 22nd January. Then during my training course I saw a lot of patients so I observed a lot of diseases that's why we cleaned our hands all the time, I followed a doctor during a radiography infiltration whereas it was very dangerous because there were radiations and I saw a blood transfusion.

First, for my work experience I went at a veterinary clinic at Oiry, a city near Epervanay. I love animals that's why I did my internship at a vet's.

There are 3 vets and 3 assistants who take care of more than 300 animals a week. Most of the time they take care about dogs, cats and rabbits. However, sometimes they also take care about new pets like snakes or Chinchillas.

In the veterinary clinic, there are 2 operating rooms, 1 radiology room and 2 consulting rooms.

Then, During the first days, I just looked at what the people made. I cleaned animal's boxes and I walked dogs at midday.

After that, Catherine REMAN, one of the vet, asked me to help her. I practiced vaccinations, I helped to get sleep dogs and cats before operations. Most of the time, operations are sterilizations.

Finally, I liked my work experience at the veterinary clinic very much because I like to take care of animals and because I was able to participate in surgical operations, so I would

like to do that job.

Although I liked consultations, I hate euthanizing animals !!
