

REPORT ON MOBILITY MEETING IN HOLZGERLINGEN, GERMANY,
FEBRUARY 1-5

REFLECTION-EVALUATION OF ACTIVITIES

SOCIAL ADVERTISING CAMPAIGN – CINEMA/ACTING

Student name/activity	Alicia Lojo	Andrea Álvarez	Andrea Garcia	Consuelo Ortiz
Social advertising campaign: Presentation of videos Discussion-analysis of videos Competition Follow-up activity: posters: what if all these ideas came true?	After whatching the videos and enjoying the competition, which was very well organised, we started to make a poster with the video's ideas. It was a very educational journey in which i learnt a lot of things about respect and tolerance.	First of all, we whatched the videos which thought us a lot of the actual educacion system and about what a better future could look like. After that, we created some posters with the same topic as the videos; social advertising. It was hard to find the right ideas for the	At the beginning we watched some videos which were done by our colleges and we talked about which one was the best in the competition, we were divided in mixed groups and we tried to express what we had learnt in some posters.	The video presentation and making posters was the first step to start sharing opinions and ideas, and a good way to being more close with the other students.

		posters, but they came up really well.		
Workshop on improvisation/story telling with Harlekintheatre	The workshop on improvisation was very interesting because on the one hand we learnt about how to talk in public and in the other hand it helped us to connect with the other people, at night we went to a theatre improvisation and we had fun despite not knowing the language.	When they told me that we were going to make an improvisation and story telling activity, I was a bit scared due to my shyness. But then we started, saw the other ones struggling with the same things I did and I ended up having so much fun. I started to see the improvisation thing in another way. At the evening, we had an improvisation performance. We didn't understand that much but It was a great time.	The workshop on improvisation was really fun. We stayed with some comical people who taught us a lot of things about how to create stories.	This wasn't and activity that I liked because I am a really shy person but all in all It was a useful experience that could help us being more confident.
Visit in Filmakademie in Ludwigsburg Are you more aware of how film making industry works? Film making process? Sound and light systems? Jobs available in this industry?	I like so much this trip, to the film academy, because I have never been in a place like this one. We learnt a lot of things about how films are done and the videos that we saw at the end where very cool.	A really nice guy showed us the film academy where he was studying. He explained us how things work in the film industry. I really enjoyed discovering amazing new things that I didn't know. Another thing I really really liked	In the Filmakademie we learnt a lot about movies. It was a really important experience. We visited a lot of places of this industry and we felt really grateful.	It was very interesting to learn how films are made and we could realise the hard work of producing a film. They showed us some videos that were really great.

		were the videos he showed us. They were amazing!		
Art exhibition of Jo Winter in Burg Kalteneck: Analysis of art work Associations	I liked so much the sculptures of this artist, because you could imagine everything that you want of the meaning of them.	This wasn't my favourite thing. However, I learnt how an art work can reflect artists' issues. It was also inspiring and we could see the works the way we wanted and then exchange opinions. It improved our team work as well.	We went to an art exhibition where we saw a lot of strange sculptures which we had to use to write some descriptions for the last day of the trip. It was really funny because we wrote the crazy things that came into our head.	Analyse an art work maybe was the most difficult activity that we had to do so we had to express what we felt when we firstly saw the sculptures and listen to the others ideas about the artworks was really funny.
Reception in Town Hall	The reception on the town hall help us to learn about how the city and the school worked. It also seemed very important of how the city helped to refugees and the implication of the major.	Not gonna lie, it was a bit boring at first. But then they showed us the video about Holzgerlinger which was more interesting. We were also really thankful for the drinks they gave us later.	The reception in Town Hall was very interesting, we heard some words of the major, we saw a very educational video and we ate some tasty bretzels.	In the meeting with the Mayor despite of being a bit boring, we were able to appreciate how well organised are German people and how they do things in Holzgerlingen. They treated us very well.
Cultural activities: - City game - Theatresport performance - Chocolate workshop in Ritter sport factory	The cultural activities that we did were so enjoyable, starting with the chocolate fabric in which we eat and shop a lot. All the cities that we visited were very	I think this activities were the best. We were able to communicate and become the family we ended up being. Cooking, making	The cultural activities helped us to know more about the place in which we stayed. We also visited some neighbour cities with a lot of fancy factories like	All the activities that we do during the week were the best way to integrate ourselves with the rest of the students and also spend such a good time with them.

<p>- Abgold „spatzle“factory and cooking lunch together - Stiftkirche Collegiate Church in Tübingen: prof. Bredenbach explains organ - Mercedes-Benz Museum</p>	<p>beautiful and the Mercedes-Benz museum were so interesting.</p>	<p>chocolate, walking around Tübingen were the most exciting things for me. I really enjoyed getting to know a lot more about the country we were</p>	<p>the Ritter Sport one which was my favourite trip.</p>

SKILLS AND COMPETENCES DEVELOPED

Skills/competences				
<p>Computer Skills: Film/video making Photo Word Facebook Email Etwinning Others</p>	<p>When we went to the film academy I learnt about how make some things of a film and when I talked with my host family by Facebook and Gmail.</p>	<p>The movie academy increased my interest in the way movies are made and I learn the way they are made. Although our video was really simple, whatching other people's videos really instructed me.</p>	<p>With this trip we learnt a lot about computers, now i know how to use the Word perfectly. We also used a lot the email with our international friends.</p>	<p>Before going to Germany we had to create and advert about social inclusion so we had to do it with computer programs. We had to contact with our families and the only way was with facebook or email.</p>
<p>English language:</p>	<p>I had improved my English, because we</p>	<p>It was really good being able to put into practise</p>	<p>Being everyday talking, writing, listening and</p>	<p>The only way to speak there was in English,</p>

Speaking Writing Listening reading	communicated with other countries students and we are still in touch, we communicate through Facebook and Gmail.	everything I knew about the english language. I really improved my english as we could only communicate through that language, and everything we listened or read was in english.	reading english helped us to improve this useful language. Now we can use it perfectly. And we had fun while we were learning.	because all of us have different languages so this helped us to improve our skills speakig English.
Awareness of national identity	We represented our country city. It was fun to introduce foreigners with our culture and traditions, and I think that they had a very good impression about Spanish people.	I've learnt a lot of the European Union and how important is every single country. However, there are also things that need to be improved, such as the education system.	About german people i learnt that they are very serious and hard-working people. They have always everything planned.	This week made me realised that we are very lucky to be Spanish, but I also found that the other nations have really interesting cultures and things that I was able to appreciate.
Awareness of multilingualism	During this week I tried to learnt a bit of all the languages of DEFTRIT, it was complicate but I had a really good time trying it.	Speaking in english wasn't hard at all. We also understood pretty well Italian, because it was quite similar to the Spanish. But when It came to try to understand German and Lithuanian... That was imposible! It was really fun learning some simple and basic words in every language.	During this week I learnt a few words in other languages. It looked like if i were another girl of their countries. I thought about how different are the sounds and pronunciations.	It was very curious to learn specific words in other languages like German or Lithuanian that are so different from ours. And also appreciated the beautiful accent of French and Italian. It was funny to listen how people spoke our language.
Awareness of European identity	Now I understand much more about European union and why it's necessary for us.	All of us traveled to Germany being each one from their country. But communicating in english and getting to	From my point of view i felt that the equality of dthe UE was true.	Being together during this week made me realised that in spite of the fack that we belong to diferent cultures and we have

		know each others really made us realise that we were all part of something bigger.		different traditions, we will be always European.
Public speaking skills	I feel more self-confident because I had to present my school and country to very tolerant and friendly people.	I've always had difficulties when It came to speak in public, as I'm really shy. But knowing that the other guys were in the same position as me, made me feel a lot more comfortable and confident. It was really nice to get the oportunity to practise my public speech.	Talking that much in english showed us how to presentate our ideas in public.	This was the hardest part for me so I intend to avoid that, but in the end it was impossible and I tried to be as comfortable as possible
Presentation skills	With that, I learnt about how speak in public and how represent my country.	This week has helped me improve my presentation skills. Now, I can speak in public in a more confident way and talk about whatever topic.	I learnt about how i have to do a presentation about my city.	Hereinafter I will be able to do presentations in a better way, beacuse this helped me being less nervous.
Debating/discussion skills	Although we were a bit lost with the feedback , I like to debate which we seemed the most interesting and well done video.	This was a good way to share ideas with the rest of the group. Despite having different opinions an ideas we tried to work together and solve the problems in the easiest way.	Debating about the video was for me really interesting	Debating about the videos was a great way to be respectful with others ideas.
Critical thinking-analysis of art	Even we was a little confused to know what had to be done and	This is not always easy. We had to deal with a lot of ideas and	Showing our crazy ideas about the art sculptures	We wete a bit lost and we didn't know what to say

	what we should write, we found it very interesting to comment on a work expressing our emotions.	emotions that came to our head.	showed us to be more confident.	about those sculptures but we tried our best.

HOST FAMILIES

Alicia Lojo	Andrea Álvarez	Andrea Garcia	
I have a really good time with my family, they were very nice. Now, I have a very good friend from Germany and their family was like a second family for me.	From the very first moment I spent in my new house, It felt like home. The people I was spending the week with, became my second family. They were really caring and loving, and they were kindly enough to introduce me to their country and their daily life. I was really lucky to have had that amazing opportunity and I'm really thankful for all the memories I created and I will never forget.	My family in German was really polite, they showed me a lot of typical german dishes and they helped me a lot during the week. Awesome guys ever.	I have to say that my family was incredible. They took care of me as if I were another member of the family. The communication with them was very easy because all of them speak in spanish. I am so thankful and now, I know that I have a second family in Germany.
