

ACTIVE IN NATURE, ENJOYING THE NATURE!

Marta Armendia Santos. Spanish Coordinator.

CN: 2015-1-NO01-KA219-013242_4

The third mobility with students, regarding to the ERASMUS+ program ANEN (Active in Nature, Enjoying the Nature!), took place in Klaipeda (Lithuania), during the week, from 7th to 13rd of March 2017. Six students of 2nd and 3rd of ESO and two teachers (Marta Armendia and Julia Rodes) of our high school, IES LEONARDO DA VINCI of Alicante, went to this nice country on the seashore of the Baltic Sea to take part in interesting and different activities with other students and teachers from Norway, France and Lithuania.

We arrived in Khaunas airport (Lithuania) one day before the meeting, because we wanted to travel by direct flight from Alicante and so we could have the opportunity to share the “Mum’s day” with our host families. Some of us went to the zoo, others went to the beach or to the countryside.

On the one hand, during the week, we did a lot of things at school; for example, we learned to make a flute with recycled materials in a musical lesson and we engaged in some Lithuanian popular dances and games. We made murals about the Natural Park and ICT presentations were made by international teams. However, we liked the “Guard Battery, Memel-Nord” trip the most.

It was an amazing experience for us, despite the weather. When we woke up that morning it was snowing!

We left the school and went to this beautiful place near the Baltic Sea and, suddenly, the sun raised. We could pick up stones on the beach and look for amber. In the afternoon, we visited a Second World War bunker and a war veteran explained to us a lot of interesting things about the life during those days.

We enjoyed the Ventè Cape trip too, especially when we went up to the top of the lighthouse and we could admire the landscape of the seashore.

On the other hand, we enjoyed the visit to the Old Town of Klaipeda. Its streets are totally different to ours. Its buildings are made with wood and sheet metal and there are a lot of alleys with singular small sculpures (dragon, cat, mouse,...).

To sum up, we would like to point out that they have an special school system that promotes creativity and the love for Music, traditions and art. In addition, their school is an open space where there are no fences.
