14. What the Science 4 all project has changed in you and/or your life? Will it (and how) influence to your future?

POLAND
Thanks to the project, I have significantly expanded my work technique, especially with methods using ICT. I had the unique opportunity to increase my European awareness and develop in a multifaceted way, both from the professional and personal side.
It made me sure that teaching in a traditional way at school is unsuitable for our students to develop their skills. I got to know many innovative teaching methods, increasingly using ICT tools. I improved my communication in English - which made sure that I use this language in a communicative way.
contact with people from other countries and communication in a foreign language
ESTONIA
1. It improved my foreign language skills. 2. I have met many interesting people. 3. I will use a lot of new tools and methods in my future job. 4. I will write another Erasmus+ project in the future. 5. I have become more confident in teaching
FRANCE
The way to teach: a deep use of the English in my classroom and new ways of solving problems.
It was an amazing experience and the opportunity to meet really innovative teachers; it helped me to widen my way of teaching.
So enriching experience ! So interesting to learn about other cultures. Inspiring to meet so great teachers.
my openness, the joy of sharing, my way of seeing the teaching

So enriching experience !, it gave me the idea to work in an Highschool abroad for a year or more

PORTUGAL	
It proved that distance is not a problem, cooperation and collaboration are essential, we can make a difference in students lives, that hardwork is worthwhile. It gave me a different perspective on how to see teaching. Helped me gain confidence. I learned a lot with our partners, students... Met fantastic people...	
Through the exchange of experiences with the partners, I was able to open horizons regarding the ways of teaching and motivating students in the present and in the future.
