“Science 4 all” **Dream story of my life**

A collection of imagined students' biographies. Three pupils in every partner country will describe themselves and send this description to colleagues abroad, who continue a story, including education and work in science brands.

Every country starts writing 3 biographies. Then students from other countries continue the stories: FR in blue cells, PL in yellow, PT in green, EST in grey cells.

Presentation C5: Each country will present 1 story in Portugal during a mobility: EE one from 1-3, FR 4-6, PL 7-9, PT 10-12.

Dates for writing the stories: 15-21.01.2018 (15-20), 22-28.01.2018 (20-25), 29.01-4.02.2018 (25-30), 5-11.02.2018 (30-35)

STORIES 1-3

		Estonian authors' names:		
Age	1. Mark	2. Kaire	3. Ksenija	
15-20	<p>My not-so-early school years, as it seemed to me, dragged on for a century. Didn't have any problems communicating with my classmates and in general, everything was pretty nice, when it comes to school things. Though, some lessons were a struggle, I tried to rush them and not give into them too much. As I lived my ordinary life of a pupil, the basic school finished and I had a choice what to do with my life from then on. My choice was to continue studying in a local upper-secondary school for three more years, and it wasn't really different from my school years. Again, as life dragged on - I successfully finished the 12th grade and again was put in front of a path. This time, a straight one. A university.</p> <p style="text-align: right;">Mark</p>	<p>I learn at school very well. My favourite subjects are Chemistry, Biology, Maths and Physics. These subjects are unusual and very interesting. In my free time I learn more in these subjects in order to get more information and be successful. Scientific subjects are also interesting because we can do experiments, get to know where we live and how we live. So, I want to connect my future with science. When I turn 20, I would like to be an orthodontist (dentist) because for this speciality I need to have good knowledge of Maths, Biology, Physics and Chemistry. These are the subjects which I like best.</p> <p style="text-align: right;">Kaire</p>	<p>I usually get up at 7 o'clock. Then I eat my flying cereals. After breakfast I brush my teeth. Finally, I sit on my blue dragon and fly to school. Every pupil in my school has a dragon. The first lesson is Chemistry. My teacher always brings a magic wand on her lesson. She makes different experiments with it. Then I have 2 lessons of Maths. Here my teacher always sits on a throne which is made of numbers. That is scary.... Moreover, he has a horrible and tiny hat. Three last lessons are Physics. That is horrific. Three lessons of physics - are you serious?! Oh...Ummm.. Our teacher is a normal human. These are my routine school days. I wonder, what my life would be in 5 years!</p> <p style="text-align: right;">Ksenija</p>	

<p><i>Pupil(s)</i> FR</p>	<p>20-25</p>	<p>I started studying chemistry. One month ago I did an experiment and suddenly, not on purpose, I discovered a new atom and I created a new material. I called it «the negip», the contraction of «never give up» because it's the definition of my life. One year later I received a nobel prize of chemistry, I'm now writing a book for teenagers who love chemistry and who need support.</p> <p>Robin Mathilde</p>	<p>When I was 19 years old, I passed my matura national exam - and I went to Harvard School of Dental Medicine. This was the fulfillment of my dreams! In that school I learnt for 5 years. During that time I met new fantastic people and I gained new skills. I got to know a gorgeous boy whose name was Adam. After a few months of our acquaintance he asked me out. I have gone out with him till now. After 5 years of studying I wrote master thesis and did a degree in science. Then I got the position of orthodontist in Chicago.</p> <p>Gabriela M.</p>	<p>At the age of twenty I knew I was accepted in the medicine university. At 22 my life kept the same, so I decided to join the hockey team and we became champions of the first league. At 25, I finally finished my degree and left the university to start an internship at a hospital.</p> <p>Simão Seno</p>
<p><i>Pupil(s)</i> PL</p>	<p>25-30</p>	<p>The book however wasn't a success and I've lost a lot of money. The rest of cash from my Nobel Prize I donated for chemistry workshops for students. I found job in a big laboratory on Crimea and I was researching human excrement. During a routine research I've discovered a new type of plague. I've admitted it to WHO and I started working on a cure - an antidote. By a year I've found the medicine, which suppressed the epidemic. I earned millions on distribution for low prices. I decided to live my life and enjoy it a bit more so I moved to Caribbean.</p> <p>Kamil Ł.</p>	<p>When I finished my studies at Harvard school of Dental Medicine, I looked for a new job. I liked my job very much. In my job I found the love of my life, it was a patient with many dental cavities but I liked him anyway and we ended up marrying. We had to change to another city because we couldn't afford the house in Miami. We went to a village, we had two children and found a new great job..</p> <p>Silvia</p>	<p>One day when I was at my hockey training, I felt a strange atmosphere. Suddenly, my blue dragon appeared as if by magic. He took me with him. I didn't know where we went but I was terrified. After a long trip in the sky, he put me down in front of a horrible house. I entered the house and I saw a big throne which was made by numbers. I already understood that I was in my horrible maths teacher's house.</p> <p>Gabrielle Romane Guillaume</p>

<p><i>Pupil(s)</i> <i>PT</i></p>	<p>30-35</p>	<p>In the Caribbean I was happy with the life that I had. I realised that I loved Chemistry and what I really like is to discover new things. So I came back to Crimea and started a new study about cancer to try to reduce its impact and increase the life expectancy of people with this disease. Now, I continue to work in the area of science trying to help other people.</p> <p>Nelson and Daniel</p>	<p>Two years after I found this job when I was 32 years old, I discovered that my husband was cheating on me and he went away with his new wife. I was really sad and disappointed but didn't have time to cry because I still had two children so I kept on going to work as if nothing happened. For 1 year, nothing happened and it was really difficult to take care of my two children but one day, I met a man who decided to help me. For one year, we spent a lot of time together and after that we decided to get married. He was the love of my life. I'm writing this autobiography because today, the day of my 35th birthday, a doctor explained to me that I had a really bad cancer and that I would die in one week. I hope that you, Jane and Jessie will find this text. Like that you will know little more about your mother and just be sure of one thing, I love you two.</p> <p>Sayam Maxence duval Violette</p>	<p>She threw herself at me. I tried to free myself, but nothing came of my efforts. She attacked me from the back and I didn't have any chances when I felt a slight stab in my heart. I fainted When I woke up, I saw that I was not in my beloved bed only in a not very comfortable hospital bed. Next to the bed sat that nasty woman who hurt me and her daughter. She apologized to me, but I didn't even want to listen to it, because my attention was drawn to her daughter. She was beautiful and after a moment of silence, I confessed her love and she returned the feeling. Her name was Rose. A year passed. I was on Copacabana beach with Rose when my heart ached badly. I fell to the ground I went to the hospital again. It reminded me of that day. It was very bad with me. And I do not remember the rest.</p> <p>Justyna N.</p>
--------------------------------------	--------------	--	--	--

STORIES 4-6

		French authors' names:		
	Age	Calixte, Océane, Sophie	Pierre Emmanuel, Juliette, Jilali	Inès, Ariana, Chloé
	15-20	<p>A girl named Jane who lives in Dunkerque (North of France), is 15 years old. She lives with her father. She has a very good life, but her father dies two years later, when she starts her exams. So devastated when she hears this bad news, she fails her exams. During her mourning, she meets David, an old friend of her father. They are both too sad to stay in Dunkerque so they decide to do a world trip together.</p> <p>Calixte and Sophie</p>	<p>I hope to be accepted in a good high school. After my graduation, I would like to study Maths and Physics to be able to develop new technologies to help archaeologists discover new sites. In order to prepare my studies, I would take advantage of the summer breaks to visit famous archaeological sites. It would be the opportunity to know how they were built and discovered. If I am lucky I even could work with a team of scientists.</p>	<p>When I was 15, I lived in Versailles and I wanted to become an astronaut. I knew that it was hard but I was very sporty and determined. I went to high school and I chose a special pathway to learn the job of astronaut. At the end of high school, I went to a prestigious school to become an astronaut, the “European Space Agency” (ESA) in Germany. I was really happy because a lot of students wanted to study there and I had this opportunity! I went to study in another country; I love travelling. I left my country, my family and all my habits. I was a little stressed, but really excited. I saw the view of the airport being replaced by the sky and the clouds. A few hours later, I discovered Germany. During the first week, I visited the city and discovered my new school. Next week, I’ll meet my mates at the university...</p>
		Calixte Océane Sophie	Pierre Emmanuel Juliette Jilali	Inès Ariana Chloé

<p><i>Pupil(s)</i> <i>PT</i></p>	<p>20-25</p>	<p>As Jane never met her mother, Davis decided to adopt her. Now she is 20 years old and they are still travelling around the world. Today they are in Ericeira (Portugal), they are visiting the beaches. She gave up her studies and she's very happy. She managed to overcome her father's death. She had never been able to see David as her father, but rather as an older brother.</p> <p>Afonso Seno</p>	<p>I ended my high school very well and now I am in a college, learning about architecture. This is very spectacular for me and I got to know a lot. Of course, this is hard but I am getting used to it. I traveled throughout Europe and I saw different sites. After graduation I want to go to work and to live in Sweden, because they have very interesting sites. So, I am getting ready for this and soon, I will be in Sweden.</p> <p>Kaire</p>	<p>I'm going to do Master degree of Space Studies and I might work in International Space Station (ISS). During the second weekend, I met my new mates. I studied for 5 years, and I went to a language class. I was the best student on my year. I was always studying, and when I had free time I visited nearby attractions. At the end of my studies I attended Executive Space Course dreaming to achieve my goal which was working in ISS...</p> <p>Michał M.</p>
<p><i>Pupil(s)</i> <i>EE</i></p>	<p>25-30</p>	<p>Tired of travelling, the two decided to anchor in Portugal, as the living conditions there are nearly perfect. Jane, being in her mid-20's, decided to finally get a job. Things went uphill from there. An apartment, a pretty well-paid job in a local hair salon. This, fortunately, lasted for a long time.</p> <p>Mark</p>	<p>I graduated from college and I arrived in Sweden. I found a job as an archaeologist studying medieval architecture in South Sweden in Eketorp. I researched local buildings and tools. During a lecture about my finds, I met my new assistant, with whom I fell in love. Two years later I proposed to her and we bought a house and we got married. Not long after that twins were born to us : Lila and Lily. When I was on holiday in Peru with my family, I discovered an ancient city by chance. It made me very famous.</p> <p>Olga M.</p>	<p>Finally, when I was 25 years old I had an opportunity to make my first trip to space, so on 2nd February I boarded a spacecraft and the travelled for 3 days until we arrived at the spacial station where i stayed for 3 months. It was very cool to live in gravity 0. I felt that i fulfilled my dream. 3 months later come back to earth an when i had my felt on the ground, i fell down. Do not know what happened... but was weird.</p> <p>Mariana</p>

<p><i>Pupil(s)</i> <i>PL</i></p>	<p>30-35</p>	<p>David invited Jane to go to Poland for the summer holidays to meet his friends. Jane met a nice young man named John and they fell in love with each other. A short time after that, Jane asked John to move to Portugal, where they got married and had two lovely children: Ann and Jacob. Jane and David are still very close friends like family and he treats her kids like grandchildren.</p> <p style="text-align: right;">Olga Sz.</p>	<p>After that I bought a bigger house to my family. I started to spend more time at work than with my family. My wife and I started to argue everyday because of that and she was starting to be very sad because I wasn't at home with the kids. My life started to go downhill, I wasn't happy anymore. That was when I realised that my biggest dream was to build a family and then be really happy. I started to spend more time with my daughters and with my wife and everything was much better. I love my family and that's everything to me.</p> <p style="text-align: right;">Diogo</p>	<p>After my fall, I opened my eyes in the hospital for astronauts. Next to me was lying my old friend Joe. He studied with me but he was a bit younger than me. He opened his eyes and said: "Hi! How are you?" In my head was only this: "What happened with me? Why Joe is sitting next to me? That's very embarrassing!!!" Then the doctor came in and said that I had problems with living on the Earth. My body had changed. I was shocked. He said that I couldn't live here and that the International Space Station had a project. It called LOMIP (Life On Mars Is Perfect). And there were some people who wanted to fly to Mars forever. I couldn't believe it. Others just wanted to escape from this life but I couldn't refuse. Then my friend Joe told me that he would fly too. When I asked why , he just said: "To look after you" Now, after years, I'm living on Mars with my husband Joe. He have done it for me and I love him and our son loves him too. LOMIP (Life On Mars Is Perfect) didn't lie.</p> <p style="text-align: right;">Ksenija</p>
--------------------------------------	---------------------	---	--	--

STORIES 7-9

		Polish authors' names: Marta N	Martyna K	Oliwia D
		<p>My name is Marta. I was born on 27th March. I graduated from secondary school in Nowy Targ at English profile. That was a very good school. I always loved playing the guitar. This was my whole world so I was going to enroll to music school Juilliard School in New York. However I hesitated because I would have to leave my friends and family. I didn't know what to do: go to USA or to stay in my home country. My second plan in case I didn't get to Juilliard School was to set up my own business. I was thinking about buying a restaurant serving traditional food in Vilnius because I liked cooking.</p>	<p>My name is Katarzyna and I'm 36 years old. I was a student at high school in Oxford. I was the captain of a volleyball team and the chairman of the science club during my school time. I learnt very well. I had many friends with whom I met in my free time. I come from Poland, but I studied in the UK. The teachers were very positive and pleasant. I didn't know what I wanted to do in the future, but I wanted to do something related to science. My hobby was also playing the classical guitar and painting, so when I didn't have much work that was what I usually did. I liked going to concerts with my friends. It was the best time in my life I have ever experienced.</p>	<p>Hi. My name is Anna, I am 35. When I was 16 I finished junior high school in Krempachy. I went to secondary school in Nowy Targ. I chose the class with extended Polish and history profile because I always wanted to be a journalist. When I was 19 I passed my final exam in Polish, history and English. After that I moved to Krakow. I lived in a rented room which I shared with my best friend. I started studying journalism at Jagiellonian University in Krakow. I liked all the studies. It was very interesting and I had a lot of fun.</p>
AGE: 15-20		Marta N.	Martyna K.	Oliwia D.

<p><i>Pupil(s)</i> <i>EE</i></p>	<p>20-25</p>	<p>The restaurant business went better than I expected. I assumed that it would be kept afloat for some time, but not for so long. It became one of the most popular places in town and many people were coming in and out every day! And that, of course, generated a nice amount of income. I got myself a new house on the outskirts, since it is nice and quiet there, and the town being not so large - I could easily get to the center just by using a bicycle. And as life, again, dragged on for some more time. I even thought of getting a kid. Or marrying.</p> <p style="text-align: right;">Mark</p>	<p>When I was 23 years old, I joined a professional volleyball team and I joined the club academy. I made new friends. It was very different and hard for me to adapt to the new academy. My first game was awesome, my team had my back. I was so nervous that I twisted my foot and I had to wait two weeks before I started playing again. When I came back, my team won and that really made me happy. I scored two points and it was awesome! That was the best year of my life!</p> <p style="text-align: right;">Maria Inês</p>	<p>When I was 23 years old I finished studying journalism. At first, I was employed in a little newspaper called Krakownews. I had to write articles about sport, it was a very enriching experience but I wanted to do more. I worked in this newspaper for one year and when I was 24 years old, I was hired by a big television channel called Polsat 2 and I was chosen to be a journalist for the Olympics Games 2024 at Paris and was very happy!</p> <p style="text-align: right;">Bastien Noémie</p>
<p><i>Pupil(s)</i> <i>PT</i></p>	<p>25-30</p>	<p>Finally I got married, but 2 years later my husband had an accident. He went to the hospital but unfortunately he died because a careless doctor didn't help him. After that accident, I had to close my restaurant. I decided to take a medicine degree to help people like my husband. I started working in a clinic in the emergency department.</p> <p style="text-align: right;">Ana Margarida</p>	<p>When I was 26 years old, I was lucky because I joined the national UK team! I was really really happy ! Thanks to that, I met a lot of volleyball celebrities, it was a wonderful opportunity . With the team, we was qualified for the world championship in Paris. Step by step, we won every match up to the final ! We had the silver medal ! I discovered Paris, it's a really wonderful town and I decided to stay in Paris. I stopped my career in the UK team, and I became the coach of the Paris team. Two months ago, I met the love of my life...</p> <p style="text-align: right;">Ophélie Cindy</p>	<p>"Today are Olympic Games in France. That's the best day in my life! "- I thought. After one week I was walking down French streets for the last time. Suddenly, I realised that I don't know where I am. It was horrible, scary and awful. Just then I noticed a weird but gorgeous man. It was an Estonian athlete. I shouted : "Hey! " I wanted to found out the way to my hotel. After a year I was sitting on my chair in my room in Estonia. I married this weird but gorgeous man. I was planning a trip with my husband to Portugal.</p> <p style="text-align: right;">Ksenija</p>

<p><i>Pupil(s)</i> <i>FR</i></p>	<p>30-35</p>	<p>After a few years , I became sadder and sadder. I made some friends in the hospital, but not very close to me. I missed my husband and I was very attached to my patients before they died, and when death came to take their life, it was terrible. Today, it's March, 27th, I decided to put an end of my life. I think I will take some poison.</p> <p>Hugo Roxane</p>	<p>He loved volleyball as much as me. We got acquainted when I became a coach of a team in Paris. His name is Louie. We now have a good relationship because as it turned out I was his first love too. But in volleyball I became better and better every day and our team won every game, because we were really strong. Now, I am sitting and watching these pictures, when I was young and I really wonder, how many good moments I had and I have now.</p> <p>Kaire</p>	<p>When I was 32 years old, a while after getting married, my husband and I decided to have a child: I wanted a girl and my husband wanted a boy, and for our surprise we had twins. Curiously a girl and and a boy. Now at 35 I'm the happiest woman in the world with a gorgeous husband and two pretty children (katy and Joe) and now I'm here writing this story, while I should be cooking dinner.</p> <p>Pedro Rocha</p>
--------------------------------------	---------------------	--	--	---

STORIES 10-12

		Portuguese authors' names:		
	Age	<p>Maria Carrilho</p>	<p>Beatriz Domingues</p>	<p>Madalena</p>
	15-20	<p>My name is Éderzito, I'm 15 years old I'm in 9th grade. I'm Portuguese and I live in Ericeira. I go to school D. Paulo Bento XVI. I hope to be a football player but my parents don't like that idea. They want me to be a doctor. It's very difficult to conciliate school with football because I have six trainings a week. I don't have many friends because I am a little bit shy. Probably i am going to have to do what my parents want and become a doctor although it is not my dream job.</p> <p style="text-align: right;">Maria Carrilho</p>	<p>My name is Carolina Lopes,I am 18 years old. I live in Portugal. I go to Santa Maria school with my best friend.Her name is Marta Lidl. I study science and technology. I want to go to Oxford with my best friend.We have already bought the tickets for the plane. We are going to Oxford on the 26th of January. I hope we will adapt to the university. We are going to meet new people and a new community. We are looking forward to finishing school to move to Oxford.</p> <p style="text-align: right;">Beatriz Domingues</p>	<p>My name is Logan and I'm thirty-five years old and I'm here to tell you the story of my life. When I was 15 years old, my dad died in a car accident but my mom, my brothers and I survived. When I was 16 years old, I got into to drugs to escape suffering. After that, close to an overdose, my best friend Lucke, helped me get out of this life and took me to church. When I was 19 years old, my mother was diagnosed with a rare disease and the treatment was very expensive. I started working but I earned very little. So, when I was twenty I decided to go to university... I wanted to find a cure for my mother's disease.</p> <p style="text-align: right;">Madalena</p>
<p><i>Pupil(s)</i> <i>PL</i></p>	20-25	<p>I am 25 years old now. As I said when I was a teenager I wanted to be a footballer but my parents wanted me to become a doctor. And guess what! Today I am in the national football team and I'm very happy about it. My parents finally found out that it is much better for me because it gives me</p>	<p>I've been living in Oxford for 2 years with my best friend. I really enjoy Oxford: it's very interesting and people are sympathetic. In Oxford, I've met someone special: Léa Walter. She is 20 years old and it's a girl who really likes fashion. I've spoken a lot with her about fashion and I think I start to love</p>	<p>The admission to the university was the hardest thing I've done in my life. My best friend Luke helped me with this problem. He studies in the same university as I do. My plan is to work in McDonald's and study very well. After my studies, I want to find a cure for my mother's disease.</p>

		<p>great joy.I think choosing this profession was the best decision in my life. I travel a lot and I have plenty of friends. I've overcome my shyness and I even go out with a really nice girl from Poland.</p> <p style="text-align: right;">Krzysztof C.</p>	<p>fashion. Yesterday, Léa said that I and Martha can open our online shop in Paris! Now, I don't know if I must follow my dreams or carry on studying. I'm thinking about that.</p> <p style="text-align: right;">Maxence Hongre Diane Emmie</p>	<p>Now, I'm in the third year of studying. My homework shocks me every week. Luke always tries to cheer me up. He does that very well. Every month, I give money to my mum. My life begins to improve but I have an issue.....</p> <p style="text-align: right;">Ksenija</p>
<p><i>Pupil(s)</i> <i>FR</i></p>	<p>25-30</p>	<p>So, today is an important day, it's my birthday, I am 27 years old and it's also... the final of the world championships between Portugal and France. I'm ready. A little before the end of the match, the score is still 0-0. Brutally, someone hits my leg and I scream and I cry... My leg is more than broken... 5 years later, I become a doctor, and my goal is to find a cure for my leg paralysis. After 2 years of research, I finally find the cure. I use it on my leg and... it works ! I can run and I can play football ! But when I talked to the coach, he said that I can't play football, because I'm too old... Nooooooooooooo !</p> <p style="text-align: right;">Sofyan Antoine</p>	<p>I made a decision to follow my dreams, because nowadays, we can learn every time and this is a great chance for us to have our own online shop in Paris! So, Martha and I opened the online shop. Now, it is very successful! We made our own clothes and we were in different model shows, to demonstrate our success. Now we are one of the most popular shops not only in Paris, but in all Europe! But one day something surprising happened.....</p> <p style="text-align: right;">Kaire</p>	<p>I started studying psychology. It was very hard for me. But I had to help my mother. All in all, I wasn't 7 years old, but 24. My actions were very good compared to a 16 year old. I was stupid. It's good that it's changed. The years passed, I was changing more and more for better. I studied psychology for 5 years. Then they offered me work at school.. Immediately after graduation I decided that I would accept it. Somehow I managed to do that, although there was a lot of paperwork. Such work is not easy. I worked for 3 years, and when I was 28, I decided to change my place of work, I did not feel good at that school, I was ignored and rejected by others. So my best friend-Luke said that they were looking for a psychologist at school where he worked, so I immediately told Luke that I was eager to change my job. Lucke-my best friend is a PE teacher. At that school I had worked for two years and still there was that issue I'd like to tell you about....</p> <p style="text-align: right;">Oliwia S.</p>

<p><i>Pupil(s)</i> <i>EE</i></p>	<p>30-35</p>	<p>As time went on, I completely gave up on football. Either way, it didn't bring any income, so it wasn't anything to worry about. Having gotten some knowledge in medicine, I decided to advance in this sphere and try to work there. Next 5 years were spent in a local hospital, where I happily got along as a physician. I finally thought that I found my place in life.</p> <p>Mark</p>	<p>Martha met a really nice guy. She fell in love with him. She went away with him and left me alone. All our business rested on my shoulders. I didn't know what I had to do. That was the moment when I decided to finish with my fashion dream. It was the end of my career and the end of my friendship with Martha. Now I am 35 years old. I got married to my old friend Eduardo Baptista. We have two children: Adriano and Leonardo. I'm a fashion blogger and I'm really happy with my life.</p> <p>Kamil M.</p>	<p>For the first years, I met a beautiful and fabulous chemistry teacher, stay together for two years and we had even planned to marry. But my future wife cheated on me with my best friend Luke. Very jealous and irritated, I tried to kill them with a knife but he took my knife and my wife called the police. It's the reason why I'm here. In a prison. Until my forty years old.</p> <p>Margaux Iban</p>
--------------------------------------	---------------------	--	---	---
