

A new week with virtual mobilities has started. We have share old memories and cultural aspects regarding gastronomy, language and handcrafts. Each school has shown its proposal and the result has been very positive.

We started with Italy and the school presentation. We could see through our screens how big their school was and we entered in some classes to see their everyday life. Then, Portugal showed us another Portuguese symbol, Galo or Rooster. We watched a video about the Galo's tale and we understood the importance of this character for Portugal. In the end, we all created our own rooster with our personal touch.

On Tuesday, it was Sopuerta's turn, they showed us some Basque words, but in an entertaining way. We also learned about the meaning of Basque names, because almost all of them have a meaning. We ended the workshop with a "Finding the differences" game to learn about the most important mythological characters. In the second workshop, Bulgarian school guide us to a museum and we all together celebrated the International Museums day. They showed us on streaming some handcraft examples and we learned how to make our own ceramic plate.

On Wednesday, it was Italian students and teachers turn, who shared with us some information about their culture through an online game. ¡We are going to became experts! Apart from that, we watched some videos of Sto. Stefano Di Camastra... The second part was organized by Maria's school, and they presented us a workshop to reflect on current COVID-19 situation. We had the opportunity to participate in a debate, although we were at our school. Thank you for your participation!

On Thursday, we started with Poland and some videos showing their school, we felt like we were with them. We also played an online game and learned about Kashubians and their patterns. Finally, we could mix their patterns with our own symbols and make our own creations. Then, Maria showed us a summary of different activities that we have carried out during these three years and we did the final evaluation of the project.

Friday came along, the last day... The project is about to end and during this session Italy proposed us a workshop related to ceramic handcrafts. We had the opportunity to create our own jar in a template, but before that, they

shared a video showing how it is made a jar and how to decorate it. We did our best and created our own “Italian style” jar.

The virtual mobility has finished, and this is the end. The end of a project that has finished in spite of COVID-19 situation. We all finish with a good sensation and we now are aware of the fact that we are not alone; we have to develop our European feeling. We have a lot of things to learn, because each culture is different, but we all can contribute to the creation of a more tolerant, cosmopolitan and communicative society.
