

## **What a day!**

October, 2019

Dumpling challenge was one of the greatest events in the whole school year, organized by Kasia Winklas. The students (not only the participants of the project) had to make as many dumplings as possible within a time limit.

The total number of dumplings our students made was... around 500!

## **We wish you were there!**

This event was organised to show the students from our school that cooking can be a lot of fun. While challenging with the number of dumplings, they could hear stories about the activities connected with our project or they could take a look at our international cook book. We are sure that we managed to encourage our students to take part in Erasmus+ project in the future.
