

ALi.EN Painters.. writing

ALi.EN poetry!

By ALi.EN Erasmus students & teachers

Liveliness and joy like my happiest days.

Rainbow of life.

Experiences enrich life and colors stain transparency of water

Sometimes art is used to mirror one's soul

Art and water: two things together which can't be outlined

My mind is full of colorful of thoughts

I'm the painter and life is my canvas

Life is full of colors

Hw crazy is this life.

Art must be meaningful.

Life is a fleeting moment full of sensations.

Art is the only way for shy people to express themselves in a black and white world.

Art makes visible what is not always visible.

The painting comes from a place where words cannot be expressed

A painting isn't just a set of colors but is the image of an experience.

Colors mix

As beautiful as it is overwhelming.

Steal all the colors in the world and paint your life as a huge canvas.

Make your days more cheerful by coloring them..!

Life is like a set of contrasting colors.

The colors of the serenity of summer, of the sea, of sunshine.

Those colors, these art, the Flowers of Evil.

Every diversity is colored by their own light.

The purest souls love colorful things.

My life is a shade of colour..

The storm after the quiet.

Life is full of creativity.

The life is an explosion of colors.

Serenity is the true art of life.

Life is like a mirror, it smiles at you if you look at it smiling.

The colors are the smiles of nature.

These paintings give me happiness.

The beauty of colors.

Life is a huge canvas. spills on it all colors you can.

Tranquility and sometimes chaos!

Happiness is in the colors and in the art.

Nightful as the light, lightful as the night.

Art does not reproduce what is visible, but makes visible what is not always visible.

Colours! What a profound and mysterious language, the language of dreams.

Art does not reproduce what is visible,

but makes visible what is not always visible.

Although in a virtual way, these paintings express a feeling of creativity and happiness

Isn't the sky fantastic?

No matter how many times you look at it, it's never the same again.

Confusion, creativity and combination of colours

Living in a sensational art fusion.

A bolt of colors in a world full of darkness.

Let art get you through the dark.

A sunset over the sea

These images evoke natural landscapes.

The beautiful colors of life.

Chaos

The different seasons and their colours.

A really colorful landscape, like a meadow full of flowers.

There is always happiness in the chaos.

Enjoy life and have fun

How colorful and joyful life is

A bunch of different emotions mixed all together.

The imagination that we have when we are dreaming

How beautiful and colorful life is.

Enjoy the moment instead of worrying about other things.

Art is chaotic but fun just like life!
So simple and so meaningful.
Very original drawings and mixtures of colors, this is alien art.

Enjoying the little things as well as feeling free
Life has to be colorful, like these drawings
Joy is this, a colorful chaos
Colorful drawings, an example of how we have to see our lives!
The happiness of making art.

The colors flow, intertwining with one another they create something new and unique
It doesn't have to be perfect to be beautiful.
Colors mix around while the stars shine brightly as usual.
The phoenix of colours arises from the ashes.
The Pink, Yellow and White waves of joy and hope...

Leaves of our trees float through the sea like a man with no worries.
Light colors that encourage everyone with a strong energy of life.
When you dream awake
The Turkish college was so beautiful I almost left Croatia.

Imperfect things can also be beautiful.
Chaotic situation where we live
Let our souls travel through the floating colours of Ebru art
art makes our lives more colorful
shades and emotions shifting, just as human nature

Only in this bloody chaos she felt free
When all that colors get mixed
Inside chaos you can always find internal peace
It feels like flowers and water, colors of spring
Happiness painted

The harmony of colours is very beautiful.
May the colours on the paper show the mighty personalities of creators of the
masterpiece
Beautiful harmony

Some countries are disappearing, bombs are exploding
Life is so colorful
Harmony, combination and the joy of the colours makes happiness
Patterns and colors are energizing
It feels like, sun is setting, sea is waving and rays of the sun hit the forest and flowers
It's so peaceful.

The colors are so vibrant and exciting like the times we spend with the people we love
Pictures are like a combination of all colors in the world.

Seeing very meaningful black holes here
The harmony of colors makes you feel comfortable
Its like spirit of colors
Everything can be made colorful

soothing colors are very lovely and comfortable.
