

## MY FAVOURITE SPORT

My favourite sport is ice hockey. I love this because of very good looking men and because the game is aggressive. I'm very big fan to our Czech national team. And I'm always watching all of the World Championships.

Ice hockey originated at the end of 19th century in Canada (Montreal). Then it came to Europe and then to Asia. The first game carried out on 3rd March 1875 in Montreal.

Ice hockey is played for 3 thirds of 20 minutes. There are two breaks between the thirds, each lasting 15 minutes. It is played on a hockey field, where six players for each team enter the ice rink, all players have skates and hockey sticks. The aim of the game is to score more goals than the opponent. It is played with a small, hard rubber disc called a puck.

When I was younger my daddy took me to matches, because he was ice hockey player. We went to all the matches here in Havířov. It was so exciting and funny. I experienced it a lot. So I think this is the reason why I love ice hockey.
