

**eTwinning project: Me in Time**

**Phase III: Me in the Future**

**Activity:** Discussing and deciding in a transnational workgroup

**Countries & Representatives:** Constantina & Ad (Greece), Vanessa & Michal (Poland), César and Alba (Spain)

**Problems/topics of discussion:** bullying, pollution (pollution in the city/air pollution, earth contamination, sea pollution, the Greenhouse effect)

**More problems/topics of discussion:** cyberbullying, children's rights, poverty and social exclusion, racism, violence

**The objective of the meeting:** the eight representatives should reach a consensus on the actions EU should take to solve the problems of bullying and pollution (if time suffices, the rest of the problems should also be addressed)

Step 1: All project pupils visit the TwinSpace page "[Representatives and Topics](#)" and vote for the problems they wish to solve (preferably before the meeting)

Step 2: Two representatives from each partner country (elected by their national teams) participate in an online meeting on Tuesday, May 28th at 10:30 p.m. CET and discuss the topics/problems suggested and voted by the project children

Step 3: Each partner would talk on a topic and suggest solutions. After listening to him or her, the other partners can share their views on the same topic agreeing or disagreeing with the first speaker on the solutions suggested. They justify their views to the best of their abilities. The rest of the children are present and support their representatives with notes, resources, ideas, arguments, etc.

Step 4: The representatives draft a list of solutions each contributing with thoughts and ideas. (they can use voice typing to move the process faster) Eventually they read and sign it.

## Bullying

Spain: Emotional education must be a compulsory subject at school. !2!

Polish: **Psychological bullying is the biggest problem.** !4!

Greece: Psychologists must be at schools, so they can help the children. !1!

Turkey: discussion groups !1!

## Environmental Pollution

Turkey: There should be filters on factories. !1!

Polish: Air pollution is a big problem. !2!

There should be other sources of energy. !1!

Spain: **Ban plastic !3!**
