

## Hanover today

Hanover is home to people from all around the globe. The large city is located in the north and accommodates over 180 different nationalities. We have eleven universities, multiple libraries and other educational institutions such as multiple vocational schools. There are 51 different neighbourhoods which are concluded to 13 districts. Even though Hanover's population hasn't changed much over the years when you look at numbers, but it still is home to 532.000 people. So why not make it 532.001?:)
