

I feel peaceful and relaxed at the end of a long and tiring process. This process has made various contributions to me and my students. It has taught us new practices, methods. It has developed our quick decision-making skills, mental flexibility, and respect for different cultures and languages that we would never have learned if we had not taken this path.

Additionally, we mostly haven't given chance to use English in real life because of the university exam expectations. Believe it or not you and your students have to use English in real life with real people which is the best way to practice language with these kinds of projects. Besides you gain a chance to meet people from different countries, learn about their culture and find a connection.

After the pandemic period we all started to spend more time in digital comparing to real life. The lockdowns and restrictions forced us discover new opportunities like eTwinning projects. Since the high school education was all online we found new web2tools to be more tolerable during homeschooling as teachers. These discoveries made our project more visible and digital.

I would like to show my appreciation to my lovely, responsible and intelligent students. We became like a family during our mythical journey, they never disappointed me and let me down. They are one of a kind! Thank you the best team ever!

GOODBYE

First of all, I would like to thank all the teachers who contributed to this project and gave us this wonderful opportunity with their ideas.

In addition to increasing our cultural background, we had the opportunity to understand team spirit, develop our digital capabilities and express ourselves with my talented teammates. We acquired new hobbies and increased our sense of responsibility. We learned and shared a lot together.

I am very lucky to have the opportunity to become friends with talented, sincere, funny and beautiful people. The chance to both introduce our own culture and learn the culture of our new friends with my teammates is priceless.

I am very happy that I have been able to contribute a lot to myself in this difficult process our world is going through. It was an atmosphere where everyone supported and motivated each other.

I would like to thank all the teachers in the project who worked for us, supported us in every situation and helped us improve ourselves, and especially our dear teacher Neelihan Sevgin Saltan, who introduced us to this project, so glad to have you!

It was a great experience to complete this project in the best way with my friends from different countries of Europe. I hope you will always be happy!

Goodbye!

I really want to say it was very fun and educative project for me. I learned a lot of new things and it helped me to improve my English well. It was a different experience because this was my first time in an e-Twinning project and I have never thought it would be this good. Also I had new friends. This project helped me to be more social. You know in this pandemic, it's very hard to communicate and meet with your friends. So it was a good way to make friends. I learned how to use web2 tools and it would be very useful for me in the future. My teacher was very helpful for everyone. She did a lot of things and I can't tell you how much she tried hard for this project. And my friends were very incredible. We did everything and had fun together. Thank you all and other teachers, too. They were awesome. I hope we can see each other again. See you later!
