

## Green Hanover

Hanover is considered as the city with the biggest green areas in Germany. As I myself grew up here I only can approve this fact. Nearly 45.000 Trees are located in Hanover and every year there are planted between 500 to 700 new ones. To sum all up, we have this huge Park which is called "Eilenriede". It has a variety of playgrounds and a lot of citizens do bicycle tours or do sports there. Not only does it offer a lot of activities it is also considered "the lungs of Hanover". A part of that we have a lot of different other Parks and Gardens. But one of the most famous would be the "Herrenhäuser Gärten", this garden is so beautiful and has an very interesting history. But it would take to long to sum it all up in this text.

So if you are interested in the History of this magical garden, look it up!
