

ERASMUS+ PROJECT MOTIVATION AND MOTION.

MINUTES OF THE ONLINE MEETING

Date:

27th november, 2020. 17.00-18.00

Participants:

Jürgen Hörndler, Birgit Bogermayr (Austria)

Benito Sánchez, Maria José Vélez, Encarna Mateo, Noelia García (Spain)

Platform:

Zoom.

Contents of the meeting:

After greeting all the participants and commenting on the situation in Austria and Spain with regards to COVID, we start planning the development of our project.

The Austrian participants have already started working on a video about the partner school in Spain. Maria José Vélez suggests that we should follow the activities that are planned in our project but we should also design some new activities for the new situation as we need to carry out some online tasks.

Regarding the extension of the project, which we all agree to do, Austria has to apply for it to their national agency as the coordinator of the project.

Austria has a group of 18 students who are 16-17 years old. Spain has a few more students of the same age. We have to respect the number of students that appear in the mobility to cover for the flight and individual support but now we can take this as an opportunity to imply more students. The Austrian participants inform us that they can involve more students from their school too.

We will work with Twinspace and Etwinning. Everything will be uploaded, the teachers' meetings, activities, pictures and presentations, etc. We need to inform all the school community about our project and we should show proof that we have done it and carry out the dissemination which includes social media and newspapers, etc. The final report will be done by Austria and sent to their national agency. Spain and Austria have to select the students who are going to participate in the project and give them a password for etwinning.

Agreements:

1. Creation of a Logo for the project. Spain has already done it and presented it in this meeting.
2. We suggest doing the first online activity before Christmas. There is a lockdown in Austria and students can connect from their homes. In Spain students can connect from the school.
3. Students can do the presentation with the videos about the schools and towns where they live. We'll meet on zoom with the whole group and they will do the online presentations about both their schools and their towns. We try to agree on a day for the presentation but we need to come to a further agreement by whatsapp. Possible days: Monday 14th of December at 9.00, Tuesday 15th and 10.00 or Wednesday 16th at 11.30. This activity might take one hour or less.
4. After Christmas there can be a follow up meeting in January.
5. Creation of a Padlet/flipgrid page to open a topic of discussion, the topic can be wishing everyone a happy Christmas. Then, everything will be uploaded onto twinspace.
6. Austria will work on the presentation with flipgrid and register all the students on Twinspace.
